

TEFILL STONE REPAIR KIT

TeFill is a dual viscosity stone repair kit. Tefill dries in under a minute and leaves a polished finish on stone.

Use TeFill 1 for fissures, scratches or chips on horizontal surfaces.

Use TeFill 2 to repair larger chips on both horizontal and vertical surfaces.

Use TeFill 3 Activator to create the chemical reaction.

HOW TO USE:

Choose the TeFill Cyanoacrylate viscosity that is best for your application.

Slightly overfill the damaged area with Tefill.

Spray TeFill 3 Activator and let it cure. It will take less than a minute. If not fully cured, spray TeFill 3 again and let it cure.

Scrap the excess Tefill off with a razor blade.

Buff lightly if necessary for a polished finish.

Store in a safe place. Keep all containers closed when not in use. Store in temperatures less than 75 degrees.

WARNING!!!

TEST FIRST ON WHITE OR LIGHT COLORED STONES FOR DISCOLORATION. On certain light or white stones, it is possible it will turn a dark color. PLEASE TEST FIRST!!!

SEE SDS FOR SAFETY INFORMATION AND FIRST AID.
