## ATTENTION

1. This device is suitable for petrol engines up to 7.0L and diesel engines up to 5.5L. Please don't attempt a vehicle with a higher engine capacity or it will cause serious damage to the device and could be dangerous to the user.
2. Don't crank the engine for more than 3 seconds. Allow the jump starter to cool down for at least 1 minute after each start.
3. Your jump starter will work best when it is fully charged. If less than 50% charged, it will not be able to start your engine.
4. Clear the dust on the electrodes of your car battery before jump starting.
5. If the instructions are followed correctly but your vehicle doesn't start instantly, please wait for 5-10 minutes and try again. But please don't make repeated attempts to jump start the engine without allowing time for the device to cool down.
6. Do not allow the positive and negative clamps to come into contact with each other when powered on.
7. Separate the cables from the jump starter when they are not being used.
8. It is prohibited to charge the device immediately after a jump start. Please wait at least 30 minutes if you want to charge the device after a jump start.
9. To preserve lifespan, recharge the device at least once every 3 months.
10. Use original or certified cables.
11. Do not expose the jump starter to liquids. Do not disassemble.
12. Avoid dropping the device and exposing it to extreme temperatures.
13. It is recommended to charge the device with the accompanying charging cable or a 5V/2A charging cable.

## HOW TO JUMP START YOUR CAR

1. Turn on your jump starter and ensure it has a charge of over 50%. (Charge fully before initial use)

2. Insert jumper cables into jumping port. The indicator light is flash alternately red and green.

3. Connect the red clamp to the positive(+) terminal and the black clamp to the negative(-) terminal of the car battery. The indicator light will changes from red and green flashing alternately light to green continuously on.

Note: In order to eliminate connection errors and ensure safety, the clamps will detect the load every 5 seconds and give a warning tone. This does not affect the jump start. In addition, the clamps will disconnect automatically after 30 seconds and red lights will stay on with no sound emitted. Please attempt to start the engine within 30 seconds. If you need to attempt to jump start the engine again after 30 seconds, please remove and reconnect the clamps, then try again.

4. Start your engine.
5. Remove clamps and pack away.

## HOW TO CHARGE PHONES OR TABLETS

Please note that "Output 1" and "Output 2" cannot work together with "In" to charge other devices.

## HOW TO USE THE LED LIGHT

1. Hold to turn on/off.

2. Press and hold down the Function button for 2 seconds to turn the LED light on/off.

3. Press once to toggle between light modes (high/SOS/strobe).

## HOW TO RECHARGE THE DEVICE

Note: Please switch the jump starter to "OFF" when you are not using it. The jump starter will discharge itself when it's switched to "ON". A wall plug adapter is not included, please use a 5V universal charging adapter to charge the device. It is recommended to charge the device with the accompanying charging cable or a 5V/2A charging cable.
