Special DIN Radios

The Europa Radio Face comes with a brand-new DIN-Kit for a quick installation and OEM look. The Europa is an excellent option for other European classics from the era that initially featured a single DIN radio because the DIN kit also enables the Europa to be installed in any application with a single DIN opening.

Europa

Grand Prix

The unique design of the Grand Prix features paddle-style controls along with low profile push-buttons and a digital display. The familiar look and feel of the Grand Prix will take you back to the '80s without having to drive a modified DeLorean! Retro Manufacturing even created a new DIN kit specifically for the Grand Prix for a hassle-free installation and a perfect fit.
