LL-LTADB

HARDWARE CONTENTS (Note: Hardware shown is not to scale)

A Lamp Pole

B Marble Base

C Washer

D Lock Washer

E Hex Nut

F Hex Wrench

G Lamp Arm

H Allen Key

I Power Adapter

⚠ SAFETY INFORMATION ⚠

Please read and understand this entire manual before attempting to assemble, operate or install the product.

1. Remove all items from packaging and lay on a soft cloth or suitable surface.
2. Insert the Lamp Pole (A) in the Base (B); then secure the Lamp Pole (A) by means of Washer (C), Lock Washer (D), and Nut (E).
3. Loosen the screws in the center of the Lamp Pole (A), insert the Lamp Arms (G) into the Lamp Pole (A), and then secure the screws by using the Allen Key (H).
4. Connect the Power Cord (J) to the Power Adapter (I).

OPERATION

At first startup, the light will be at 2700 K White Color Temperature and will start the Bloom operation. To change settings such as Brightness, Color, Bloom Speed and allowing multiple lights to sync together (via Grouping) Download the Living Lights App from Apple AppStore or Google Play Store.
Living Lights

Download on the App Store

GET IT ON Google Play

Use The Living Lights App to create an account, add your lighting fixture to your Wi-Fi network (2.4GHz or 5GHz) and enjoy full control and customization.
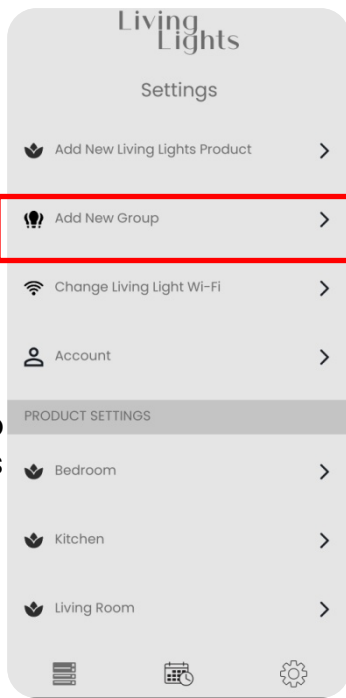

LIVING LIGHTS APP DASHBOARD

After adding your Living Light to the Wi-Fi, utilize the dashboard for easy control of Power, Brightness and Groups. We hope you enjoy Living Lights as much as we do.
