B R I G H T P A C K ' S A I M

Welcome! We're thrilled to have you here. As you explore our catalog, you're taking the first step toward **optimising your brand's productivity**. No matter the size of your operation, we've got you covered. From our versatile Manual Multi-Product Filling Machine, perfect for smaller businesses, to our powerhouse Horizontal Pneumatic Liquid Filling Machine with a 30L Hopper, we offer solutions for every industry size.

This catalog is designed to give you all the essential information you need to make the best choice for your company according to your specific needs. Plus, we've recently expanded our product range with some cool new additions—take a look and discover what's new!

Manual Multi-Product Filling Machine (A03)

R 6,815.94

The A03 is perfect for small-scale production when it comes to the filling of products, specifically liquids and pastes. This machine is ideal for various industries - food, cosmetics, and chemicals. Please note: Chunky/textured liquids and thick pastes are not suitable for the A03.

33*33*78cm | 13kg | Stainless Steel & Teflon | 5L Hopper Capacity | Fills 10-100 ml | Manual

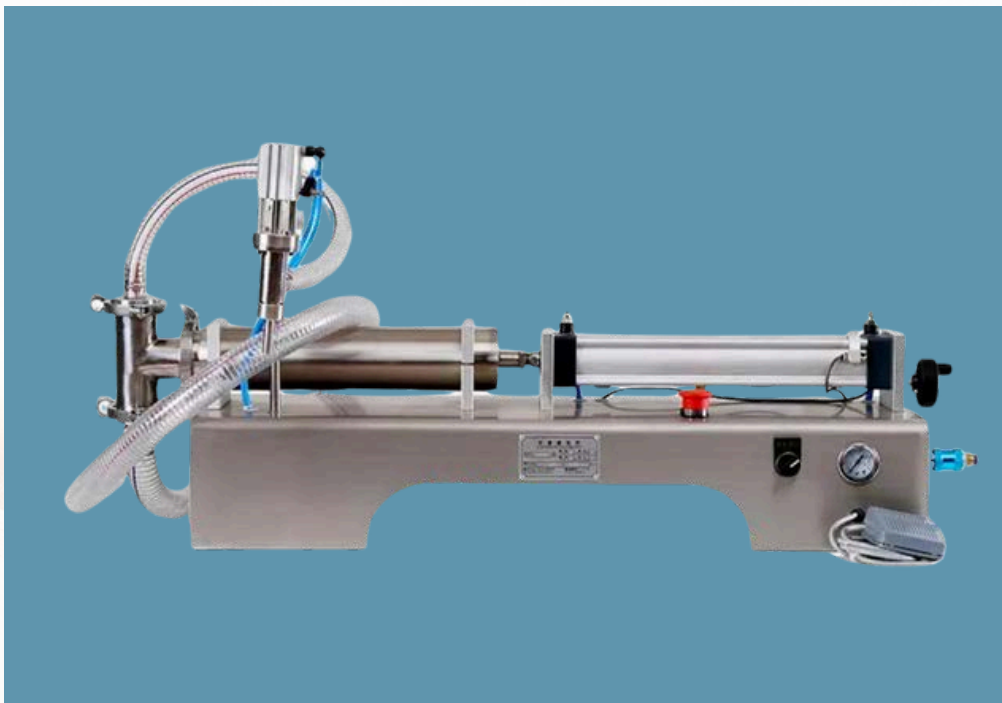

Pneumatic Multi-Product Filling Machine (A02)

R 9,499.81

This pneumatic filling machine handles the filling of a wide range of liquids and pastes with ease. It is operated by means of an air compressor (not included) and stepping on the paddle initiates filling for effective, rapid and accurate production. Please note: Chunky/textured liquids and thick pastes are not suitable for the A02.

33*33*78cm | 13kg | Stainless Steel & Teflon | 5L Hopper Capacity | Fills 10-100 ml | Needs Air Compressor | Automatic

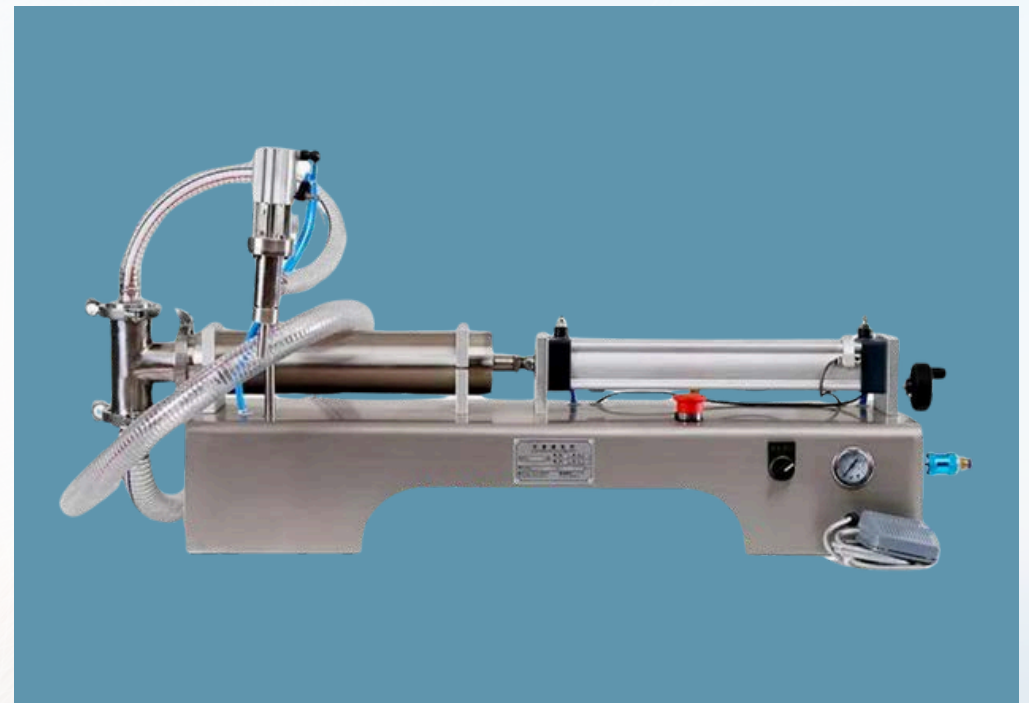

Horizontal Pneumatic Liquid Filling Machine

R 16,789.98

The (100-1000ml) - Single Nozzle Precision Filler is designed to increase production efficiency of small to medium-sized enterprises. It is operated with an air-compressor (not included) and is simple to operate.

**220V/110V | 125*45*45cm | 26kg | Stainless Steel |
5-25 Bottles/min | Fills 100-1000 ml | Needs Air
Compressor**

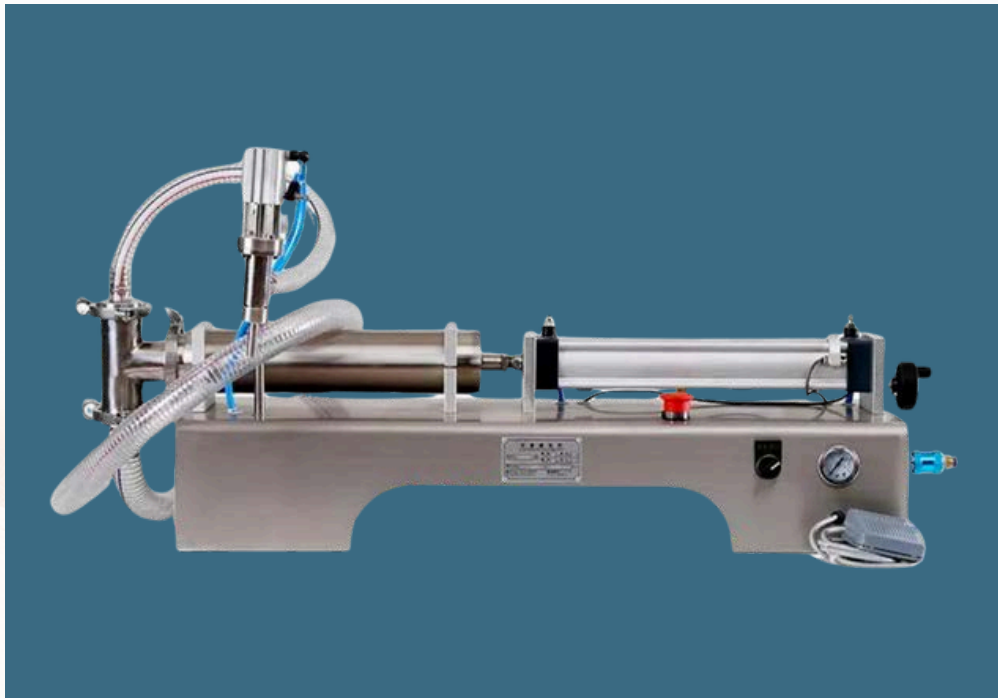

Horizontal Pneumatic Liquid Filling Machine

R 22,281.48

The (250-2500ml) - Single Nozzle Precision Filler is suitable for medium to large scale production i.e. the filling of liquid products across various industries.

**220V/110V | 125*45*45cm | 26kg | Stainless Steel |
5-25 Bottles/min | Fills 250ml-2500 ml | Needs Air
Compressor**

Horizontal Pneumatic Liquid Filling Machine

R 30,031.56

The (500-5000ml) - Single Nozzle Precision Filler is the machine of Brightpack with the highest filling capacity and is the ideal production solution for large-scale enterprises across a variety of industries. It is also the heaviest machine with magnificent filling capacity.

**220V/110V | 50kg | Stainless Steel | 5-25
Bottles/min | Fills 500-5000 ml | Needs Air
Compressor**

Horizontal Pneumatic Liquid Filling Machine With 30L Hopper

R 23,943.51

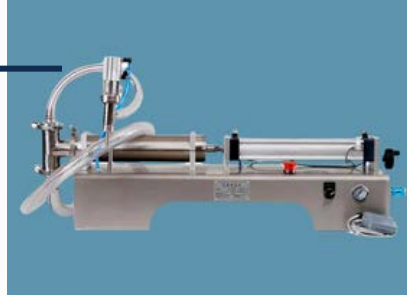

This powerhouse of a machine is suitable for larger enterprises (the 30 ml Hopper that is included, saves time due to fewer refilling). It can fill liquid products ranging from 100-1000ml. Although the machine is easy to use, customers are advised to use the user manual.

**220V+/-5V | Stainless Steel | up to 50 Bottles/min |
Fills 100-1000 ml | Needs Air Compressor**

Manual Multi-Product Filling Machine (A03) | Manual

R 6,815.94

Horizontal Pneumatic Liquid Filling Machine (100-1000 ml)

R 16,789.98

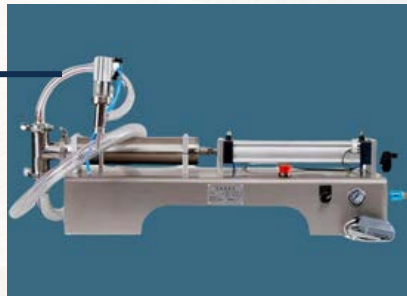

Horizontal Pneumatic Liquid Filling Machine (250-2500 ml)

R 22,281.48

Pneumatic Multi-Product Filling Machine (A02) | Automatic

R 9,499.81

Horizontal Pneumatic Liquid Filling Machine (500-5000 ml)

R 30,031.56

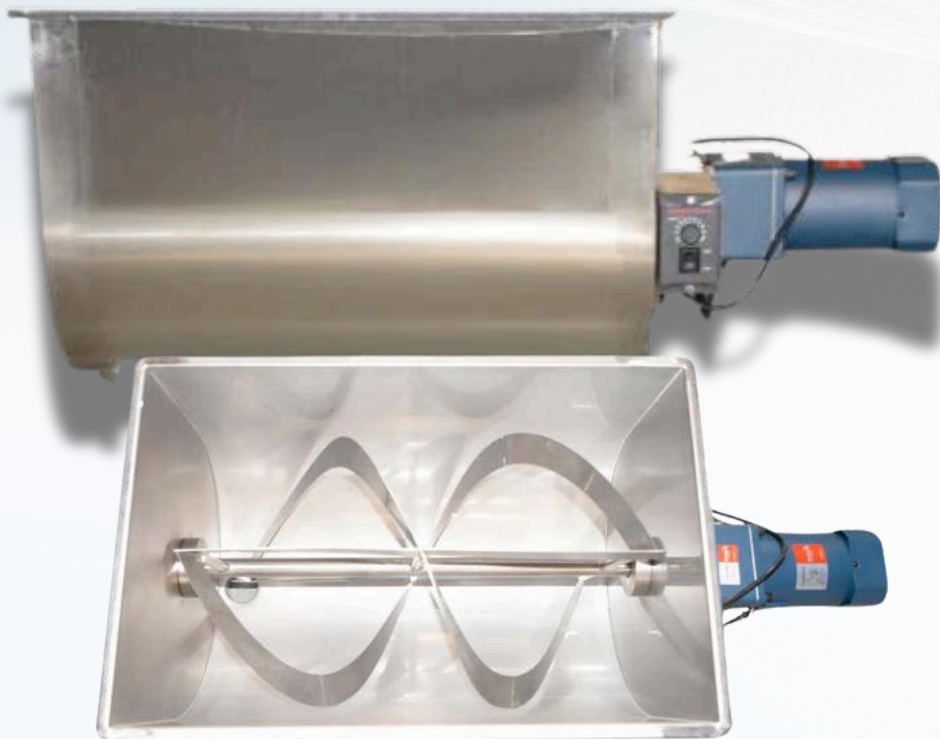

Horizontal Pneumatic Liquid Filling Machine With 30L Hopper (100-1000 ml) for thicker pastes

R 23,943.51

U-Shaped Motorised Ribbon Mixer with Speed Control for
Horizontal Paste Filling Machine

Elevate your production line with our **U-Shaped Motorised Ribbon Mixer**, the perfect companion to our **Horizontal Paste Filling Machine**. Designed to seamlessly integrate and enhance your filling process, this versatile ribbon mixer ensures your products are perfectly mixed and solid particles remain suspended for even distribution during filling. Ideal for a variety of industries, this mixer is an essential addition for achieving consistent quality and efficiency in your filling operations.

10kg | Stainless Steel | Capacity: 80L |
94*41*41cm | **Compatible with the Horizontal
Pneumatic Liquid Filling Machine With 30L
Hopper | (100-1000 ml) for thicker pastes**

Scales

Precision Balance Scale (0.1g Accuracy) - JOANLAB
Reachable (grams): 0.1 **R 2,893.27**

The JOANLAB Precision Balance Scale combines exceptional accuracy and user-friendly features for both laboratory and industrial environments. Although not as accurate as our 0.01 reachable scale, it is accurate to 0.1 grams. It boasts a large backlit LCD display for clear readings, with versatile functions including counting, unit conversion, and precise weighing. The scale operates on global voltage with an optional battery backup for emergencies. Key features include low power warnings, overload indications, and adjustable feet for stability. Its durable stainless steel pan and platform are easy to clean, while the five-sided transparent windscreen minimizes air interference. Designed with high-grade components and a professional engineering shell, it ensures long-lasting performance and ease of operation.

Max Capacity: 10000 grams (10kg) | **Reachable (grams): 0.1** | Pan Size (mm): 170x190 | 200*265*75 mm

Precision Balance Scale (0.01g Accuracy) - JOANLAB
Reachable (grams): 0.01 **R 3,077.64**

The JOANLAB Precision Balance Scale offers unparalleled accuracy with a **0.01g readability, making it ideal for precise laboratory and industrial measurements.** Featuring a large backlit LCD display for clear readings, this scale supports multiple functions including counting, unit conversion, and weighing. It automatically adapts to global voltage via an external power supply and can switch to standard batteries during emergencies. Key attributes include low power warnings, overload indications, a level indicator, and adjustable feet. The solid stainless steel weighing pan and platform are durable and easy to clean, while the five-sided transparent polycarbonate windscreen prevents air interference. Built with high-grade components and a professional engineering shell, it ensures reliable and long-lasting performance.

Max Capacity: 2000 grams (2kg) | **Reachable (grams): 0.01** | Pan Size (mm): 128 (circular) | 200*265*140 mm

Labelling & Printing

R 14,655.95

Smart Static Desktop Touch Screen Inkjet Printer - Code One

This compact, high-speed printer is designed to deliver sharp, durable prints on a variety of surfaces. This brilliant little machine can print barcodes, batch numbers, custom text, QR codes, serial numbers, and more. It features a user-friendly touchscreen interface and a foot pedal for convenient operation. Connectivity options include USB, making integration into your existing systems seamless. Ideal for manufacturing and retail environments, the Code One ensures accurate and efficient labeling without the hassle of excess paper labels.

Printing Height 2mm - 12.7mm, Width 0cm - 6.5cm | 1000 stored texts and graphics | prints on Paper, Cardboard, Plastic (HDPE, PET, PVC, PP, etc.) Metal, Wood, Aluminium Foil, Electronics, Packaging Bags etc. | 181*150*190mm (H) | Resolution: 600dpi | Weighs 1 KG

Semi-Automatic Round Bottle Labeling Machine

Introducing the Semi-Automatic Round Bottle Labeling Machine, your ideal semi-automatic solution for efficiently labeling round bottle products across various industries, including daily chemicals, food and beverage, pharmaceuticals, and more. This versatile machine accommodates different bottle sizes with ease, thanks to its strong adaptability and adjustable label length feature. The label's light eye sensitivity can be finely tuned to ensure precision labeling every time. Constructed from high-quality stainless steel and aluminum profile materials, this machine not only meets GMP environmental standards but also guarantees durability and resistance to rust or contamination. All control components adhere to international standards and have undergone rigorous factory testing, ensuring top-notch quality and long-lasting performance. With a maximum output of 50 pieces per minute for non-positioning labeling, our Round Bottle Labeling Machine is designed to streamline your production process while maintaining the highest standards of accuracy and efficiency.

**Up to 50 pieces per minute | Bottle Diameter
Range: 12mm - 150mm | Power Supply: 220 V +/-
5% 50Hz | 64*35*46cm | 24kg**
