

LIQUID COLOR PIGMENTS

Chromafluo color packs for epoxy coatings consist of a blend of various organic and inorganic pigments milled in a solvent-free liquid 100% solid epoxy coating. Chromafluo epoxy color packs products provide a standard palette of colors to support coatings manufacturers in their ability to deliver a consistent final color without the need to blend various mass tone colors. By using these blended colors, the final color is achieved by adding the color pack to a clear base. No additional shading will be necessary to achieve the desired color.

 <p>WHITE FLV-0060</p>	 <p>BEIGE FLV-1000</p>	 <p>TAN FLV-1020</p>	 <p>KHAKI FLV-1050</p>	 <p>TOFFEE FLV-1080</p>
