

**Technical Data Sheet**  
**Primed and Ready – Tough As Nails 2K Primer**

**DESCRIPTION**

For the very best Metal Veneers surface you should first apply a primer to ensure your carefully chosen Metal Veneer paint has a delightful bed to lie on. Our Primed and Ready Tough As Nails 2K Primer has been specially formulated to tackle even the most awkward of surfaces, laying down a high build base coat for your carefully selected Metal Veneer paint.

**BENEFITS**

- Prevents the underlying surface from corroding
- Easy to use with its built-in curing agent no messy mixing required.
- Optimises surface adhesion of the Metal Veneer effect.
- Will smooth the underlying surface, filling imperfections or blemishes.

**SUITIBILITY**

Suitable for priming any surface including awkward ones such as brick, concrete and gnarly pieces of wood.

**COLOUR**

Light grey

**SHELF LIFE**

1 year

**COVERAGE**

1-2 SQMT Depending the complexity and film build required.

**FLASH OFF TIME**

15 minutes @19c

## **FINAL DRYING TIME**

24 hours

## **PREPARATION**

- Prepare your spraying area by making sure it is well ventilated and there is enough room for you to work comfortably.
- Make sure the surface you want to spray is clean, dust free and dry.
- Abrade the surface with 120 grit sand paper and then remove any dust

## **APPLICATION**

1. Remove the cap from the bottom of the spray can and insert the metal ring provided (can be found on the bottom of the inside of the cap)
2. Pull fully out and twist 360° to release the activator
3. Shake the aerosol can for 2 minutes from the point you can hear the agitator ball is free.
4. Apply in thin cross coats from a distance of about 7-10cm from the surface, you can use the built-in fan adjuster in the spray nozzle to optimize spray pattern.
5. Allow each coat to dry for 15 minutes @19c before applying further coats.
6. Shake the can well before applying each coat.
7. Allow the final coat to dry for 24 hours before you apply your chosen paint effect
8. Please note the spray can will have a useable life of 8 hours from point of activation, if you require to use it longer place the spray can in 2 carrier bags seal well and place in a separate part of a chemical fridge @ 3c this will extend the useable life of the can for up to 8 hours.
