

Complete toilet suite

Knight

TANKLESS®

Auto flush, Soft close, Toilet.

Siphon water jet, Tornado flushing

Waste is flushed by the use of high pressure jet nozzles, known as Tornado flushing. This system, while extremely efficient uses only a small amount of water with its Siphon water jet technology.

Super water saving toilet

The system features perfect flushing even with low water pressure (1.5kgs/cm². 20L/min) with a considerable water saving of 3L for a half flush and 4.5L for a full flush.

Hi-tech wireless remote

Auto flush is available by wireless remote control.

Ergonomic seat design

Toilet seat design has been relatively conventional for the past 20 years, but the new Tankless digital toilet introduces an advanced square design with a wider seat. This has been ergonomically designed to meet the comfort needs of our contemporary human body.

Seat sensor

The seat sensor detects when you sit down on the seat and allows the toilet to flush when you leave.

Night light

The LED light is designed to light up the bowl making it easier to use at night.

S-Trap / P-Trap Compatible

Less cost against wall-hung toilet system.

Auto flushing

A small flush of about 3L will be used if the seat is occupied for less than 25 seconds.

A full flush of about 4.5L will be used when the seat is occupied for over 25 seconds. Dual auto flush is available by seat sensor after the user stands up.

Heated seat

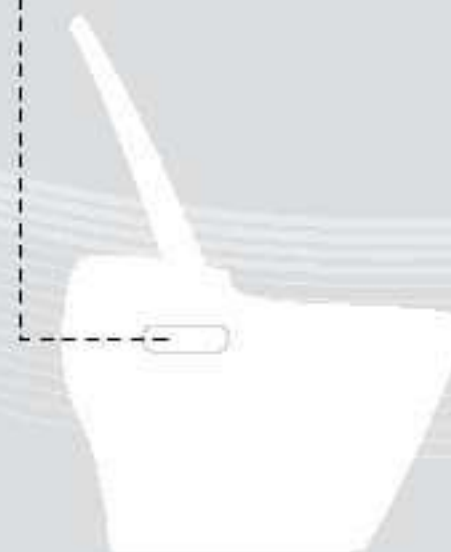

The seat temperature is adjustable.

Soft Close

The seat and lid close down softly.

Seat temp ON/OFF
Light ON/OFF
Flush

3 year factory warranty

IMPORTANT - Installation

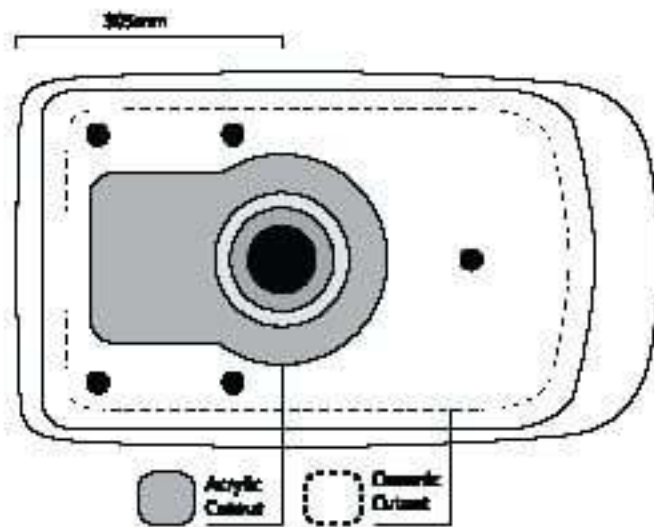

Water pressure: Minimum 150kpa maximum 750kpa with 20L per minute minimum flow

Installation:

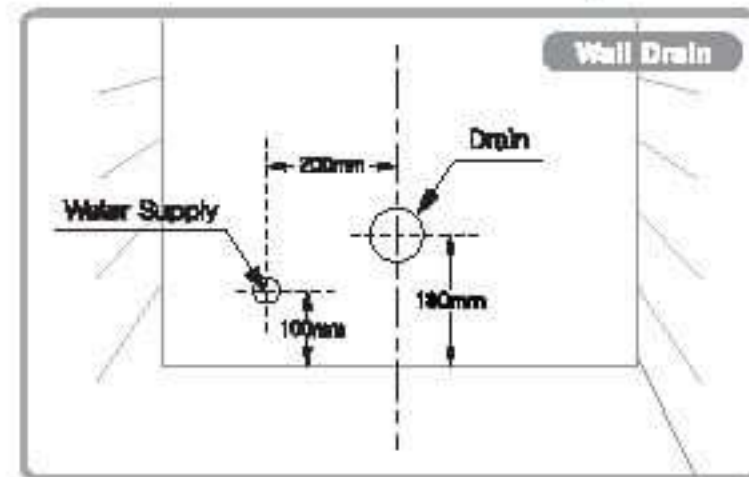

To be carried out by a licensed plumber. Installation as per local region, council plumbing specifications and plumbing codes additional back flow device may be a requirement

Electrical:

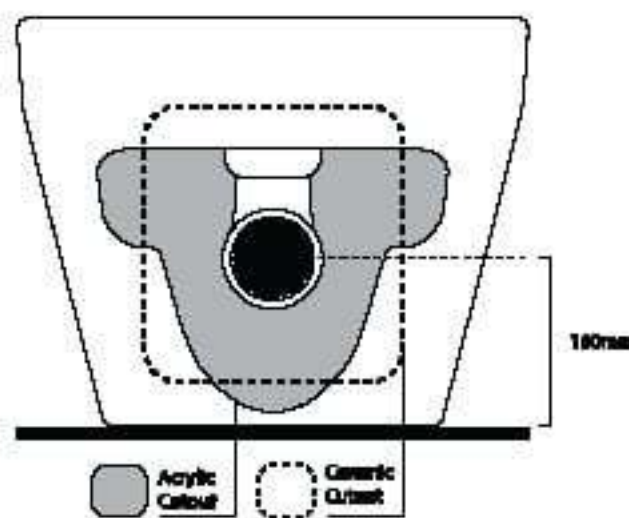

Standard 10 amp power point required

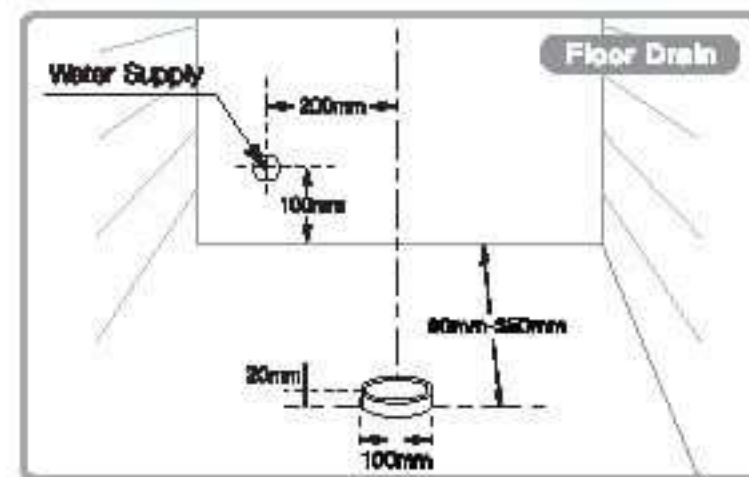

Wall drain P-Trap

180mm - Standard Set out (P-Trap)
