This powerful combination is based on time-tested Traditional Chinese Medicine (TCM) for pain relief. Results may vary, but 18-PATHS ULTRA HERBAL PAIN RUB, by Health Therapy Products is manufactured under strict Health Canada guidelines to ensure it meets our strict purity and potency standards.

**Does 18 PATHS ULTRA HERBAL PAIN RUB with PEA contain THC?**

**PEA has absolutely no THC content.**

THC is the cannabinoid that is known for its "high" or psychotropic effect. This is a main component in marijuana, and is found in smaller quantities in hemp-derived hemp CBD.

**For external use only.**

Avoid contact with the eyes and mucous membranes. Do not use if pregnant or breastfeeding. Do not apply to wounds or damaged skin.

**Keep out of reach of children.**

### HOW TO USE

Adults: Apply evenly to affected area. Cover the area completely. Can be applied 1 to 5 times daily as needed.

**THE NON-MARIJUANA CBD**

**EXPERIENCE THE POWER OF 18**  
**+ PEA (Palmitoylethanolamide)**

**FOR SORE MUSCLES AND JOINTS**

## What is 18 PATHS ULTRA?

**18 PATHS ULTRA HERBAL PAIN RUB with PEA** is a potent topical botanical balm comprised of 18 powerful herbal pain relieving ingredients infused with 250ml Palmitoylethanolamide (PEA) for sore muscles and joints.

## What is PEA? (aka - The Non-Marijuana CBD)

**PEA** (Palmitoylethanolamide) is a natural compound considered part of the cannabinoid family that **does not** come from marijuana or hemp. It is a simple fatty acid derivative **made in your body** and also found in a **wide variety of food sources** such as peanuts and egg yolk (*unlike CBD or THC*). Primarily known for its anti-inflammatory and analgesic properties, the body makes it in response to stress and pain.

PEA is not psychoactive (NO THC) or addictive. More than CBD or THC it binds to a larger number of receptors, which broadens its effectiveness. There are approximately 500 studies which show that PEA is safe, completely natural, incredibly effective, and alleviates certain kinds of pain better than some of the most commonly used pain killers.

60ml (2oz) jar

Health Canada approved active pain-suppressing ingredients (NPN #80070368). Manufactured in a good manufacturing practices certified facility.

Also available in convenient 10ml travel size

## BEST-IN-CLASS (NON-MARIJUANA) CANNABINOID PAIN SOLUTION

Most topical CBD/THC CANNABINOID products rely on the CBD or THC to deliver the majority of the pain relief benefits.

*18 PATHS ULTRA enhances the attributes of its 18 powerful botanical pain relieving ingredients with the addition of PEA to produce one of the most effective non-prescription topical pain relief products on the market.*

### FEATURES

18 powerful botanical ingredients + PEA  
Safe - no side effects or overdose levels  
PEA not from marijuana or hemp  
Topical application  
Absorption through the skin  
Non-Greasy, fast drying

### BENEFITS

More probability for positive results  
Can be applied multiple times without issue  
Alternative to people sensitive to cannabis products  
Targets troubling areas at the source  
Avoids digestive issues  
No lingering stickiness or odor

**Better, safer pain management than opioids or anti-inflammatory medications.**
