

Beef Bone Broth+ Jellies

For dogs of all ages

Prep Time: 5 mins | **Chill Time:** 2 hours

Ingredients

- 2 tbsp (6 g) Natural Gelatine
- 1 tsp (2.5 g) CanineCeuticals Beef Bone Broth+
- 1 ¼ cup Water

Instructions and notes

1. Mix 2 tablespoons of natural gelatine into ¼ cup of water until gelatine is fully dissolved.
2. Add 1 cup of warm water and mix.
3. Stir in 1 teaspoon of **CanineCeuticals Beef Bone Broth+**
4. Pour into silicone moulds and set in the fridge for 2 hours until firm.

Store in an airtight container in the fridge for 7-10 days. This recipe can also be frozen for a nice summer icy treat.

Beef Bone Broth+

ORGANIC MUSHROOM BLEND

Rich source
of nutrients

Maintains healthy
joints & ligaments

Supports healthy
gut function

Aids healthy
immune function

The **Beef Bone Broth+** medicinal mushroom blend has been formulated to provide a rich source of highly bioavailable whole food nutrients that work together to support joint and skin health, maintain optimal immune and gastrointestinal function, and to promote overall health and wellbeing. It is an all-natural nutrient-dense superfood made from the finest grass-fed and finished australian beef cattle and organic mushroom blend making it the perfect addition to your dog's meals.

A daily serving of Beef Bone Broth+ can support:

- **Gut healing and repair:** Beef Bone Broth+ is rich in nutrients such as collagen, gelatin, glycine, glutamine and glycosaminoglycans (GAGs). Collagen, gelatin and glycosaminoglycans each play an essential role in connective tissue function and help to nourish and heal the intestinal lining and reduce inflammation, making bone broth essential for dogs with chronic inflammatory conditions or leaky gut.
- **Enhanced immune function and anti-inflammatory action:** The majority of our dog's immune system is connected to its digestive system, where it acts as the body's first line of defence. By working to restore the integrity of the intestinal lining, the ingredients in Beef Bone Broth+ enable the immune system to function more efficiently at preventing pathogens and other foreign materials from entering your dog's bloodstream and triggering systemic inflammation and disease.
- **Increased hydration:** Beef Bone Broth+ is a great source of electrolytes that provide a quick and easy way to keep your dog well hydrated during illness or on hot days.
- **Improved joint, skin and coat health:** The ingredients in Bone Broth+ play an essential role in connective tissue function, providing strength for muscles, joints, ligaments, cartilage and bone.
