DETAILS

Our compact, brilliant LED shop light isn't much bulkier than a tube, but it is a whole lot brighter. What's more, it comes with 3 user-selectable color temperatures—warm, natural, and cool white—built in. This allows a single style of light to be purchased in bulk for projects. During installation, just set each fixture to the right color temperature for its job. (Users can also change the color temperature after installation using a side switch)
