## New Product Announcement: Replacement Turbo for Detroit DD15 Applications

BorgWarner Emissions Thermal and Turbo Systems Aftermarket is pleased to announce the release of its S410G for Detroit DD15 (OM647, 14.8L) engines. This value-driven turbo features an enhanced bearing system and Forged Milled Compressor Wheel (FMW) for increased turbo life and durability. To help prevent premature turbo damage, each unit is equipped with a warning tag that displays a QR code taking the installer to an internet site to receive diagnostic info and confirm the boost control system is functioning properly.

Warranty, 12 months, 100,000 miles.

### OEM to BorgWarner Part Number Cross-Reference
