Stay in the know about the best all-new beauty products releasing this month.

July came in *hot* – in the most literal sense of the word. Everybody who was wishing for a hot girl summer might be regretting the scorching weather the season has brought. Those who were ready with **sunscreen**, **makeup products with SPF**, and lightweight skin care products might not mind the billowing heat; but those who didn't get the memo from **our past beauty launches roundups** don't need to worry either. This month's beauty launches have our backs.

From products to keep your skin from becoming *too oily* during the day to serums that'll replenish your dehydrated skin, and palettes that will emphasize your natural glow, the beauty brands didn't come to play this month. Below, we've rounded up all the best beauty launches coming in July to keep you (and your beauty routine) updated.
