# The Cruzaa Story

Our journey started in 2015 when we began experimenting with tech that was fun, stylish and complimentary to modern lifestyles.

We noticed a rise in the popularity of electric-assisted products like electric scooters and e-bikes.

Since our interest grew, we carried out extensive research and wanted to create something of our own and unique.

We have worked tirelessly making sure safety, design and user experience were optimised and our products are fun whilst fitting perfectly into everyday lifestyle and making commuting more environmentally friendly.

And so our first product was the fully electric Cruzaa E-scooter was launched. Although we couldn't be prouder of our electric scooter we have since launched further unique products to fit into the Cruzaa portfolio.

Tim Cahill joining Cruzaa has brought a wealth of entrepreneurial experience and creativity whilst continually driving our strategy and fulfilling the vision.

# The Cruzaa E-Scooter

The Cruzaa sit-down Electric Scooter is an exclusive lifestyle premium scooter under the Cruzaa product family range. The Cruzaa is 100% electric with a unique foldable slick frame design, making every day social and transport an effortless pleasure, with an impressive range up to 30 miles and comes with Bluetooth & built-in speakers
