DATASHEET

PAPIER Ø40 SINGLE PENDANT

Papier is designed around curves - soft curves that create unities. The lamps in the collection are created from the same starting point, a number of shapes have been repeated, distorted and refined until they have reached the right expression and style. The distribution of the light through the paper is not only very aesthetic but also highly functional and practical. Rice paper has many unique qualities - it contributes with lightness, elegance and tactility and the lamps appear as almost floating sculptures.
