

## Super Features and Accessories with the Slim - 20 Litre Personal Cooler

### PLEASANT AIR DELIVERY UPTO 8 FEET

The HAVAI Slim Personal Cooler is compact and has side handles to move the cooler around easily. If you sit around the cooler you can feel the burst of air throw on your body.

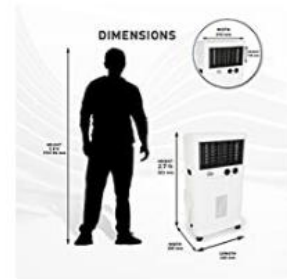

### HAVAI Protection Cooler Cover

The HAVAI Protection Cooler Covers is INCLUDED with the Slim Personal Cooler and it is Anti-Bacterial and Water Resistant in nature. The covers ensures that the Cooler has a long life.

### Premium Dense Honeycomb Pad

The HAVAI Slim Personal Cooler comes with superior 5090 Flute Honeycomb Pad which is 75mm thick from the inside and have higher density of paper this ensures better cooling

### SMALL COMPACT SIZE

## Features: Slim Personal XL

### Perfect for Spot Cooling

The HAVAI Slim Personal Cooler is perfect for spot cooling at homes. Always ensure cross-ventilation where the cooler is being used for best performance. Do not expect an Air Cooler to work like an Air Conditioner. An Cooler specifically throws cooler air and does not cool a room like an Air Conditioner. We as a responsible brand want to ensure that we keep people informed about our products.

### Perfectly Compact

Apart from 20 Litre Tank Capacity and great air throw, the Slim Personal is a very compact cooler

### Dust Net for Protection

The Slim Personal Cooler has a 75MM thick dense 5090 honeycomb pad at the back for great cooling. To ensure that the Honeycomb Pad has a longer life and a better performance we have provided filter net. This net has very small holes to ensure that apart from air nothing else goes into the Air Cooler

**T.O.P  
ENABLED  
MOTORS  
USED FOR  
SAFETY**

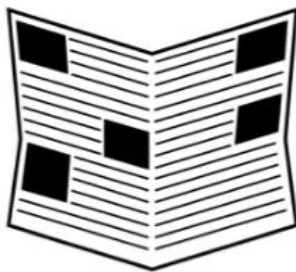

#### 3 PIN POWERCORD USED

All our Air Coolers come with 3 Pin Powercords to ensure safety first and also it helps that a 3 Pin fits well into the socket and does not come out or become loose over a period of time.

#### T.O.P ENABLED MOTORS

All our Air Coolers have motors that have Thermal Overload Protectors (TOP), this ensures safety as the motors switches off if there is any over-heating.

#### How does the HAVA! Air Cooler Work ?

It is really simple to get them working you really need to just plug and play keeping the following in mind

1. The first thing you do is fill water in the tank. This needs to be done before the Air Cooler is switched ON
2. Once you have filled the Water in the tank then put the powercord in the socket and switch it ON
3. Then put the knob on PUMP/COOL this will make the pump ON and will ensure the honeycomb to get wet
4. Once the Pads are wet put the other knob ON – High/Med or Low Speed as you desire – **BANG AND THE AIR COOLER IS ON FOR YOU TO ENJOY**

**ALWAYS ENSURE THE AIR COOLER IS IN A VENTILATED ROOM WITH A WINDOW AND ITS BACK SHOULD NOT BE STUCK TO A WALL TO ENSURE PROPER CIRCULATION**

#### Benefits of using HAVA! Air Cooler

- Low Consumption of Electricity – No need to worry about running huge bills
- Low Maintenance Cost – Over a period of time the cost to maintain HAVA! Air Cooler is very low
- Healthy – HAVA! Air Cooler does not circulate the same air in a room thereby being healthier for you

So, It's Not an Air Conditioner, Right? – HAVA! AIR COOLERS – WHAT TO EXPECT?

Correct! HAVA! Air Coolers work most effectively in hot, dry climates. HAVA! Air Coolers release a comfortable, cool breeze with the natural process of water evaporation. When warm air is drawn into the air cooler, the air is filtered through a wet honeycomb cooling medium, which absorbs heat and naturally cools and humidifies the air.
