

The Ultimate High Speed Tower Cooler

Biggest High Grade ABS Blower

The Size of the Blower is 34.5 cm

Yes, the Blower used in HAVAI Tower Coolers are the largest that you will find in the Tower Coolers category. This guarantees super Air throw. Yes you will hear the noise but remember that is the noise of the Wind being thrown at you and giving you immediate respite.

Package INCLUDES Protection Cover and Cooler Water Pipe !!

Yes, you heard that right. The Opal XL comes with HAVAI Protection cover and we are additionally also providing Cooler Water Pipe. With this Cooler Cover we want to ensure that your cooler has a longer life and with the Water Pipe we want to ensure that you have a hassle free water filling experience

Why the Opal XL Tower Cooler ?

We ensured that the Tower Cooler is packed with enough compelling features

- High grade ABS Blower with 35.5cm Height
- The Electric Motor has Thermal Over Load Protector to ensure safety while the cooler is in use
- The ABS Grade Base ensures great stability for the Tower Cooler
- Mosquito Nets for both the Honeycomb Pads
- The Tower Cooler has an Air Delivery of 1400 m3/hr
- The Tower Cooler is equipped with 3 Pin ISI Power Cord ensuring the plugs fix well into the fuse

PLEASANT AIR THROW UPTO 10 FEET

The Tower Cooler is compact and portable to ensure you can move it around to corners of your house or any other space and the elegant designs helps it double up as a showpiece

Super Features and Accessories with the Tower Cooler

PLEASANT AIR DELIVERY UPTO 10 FEET

The HAVAI Opal XL Tower Cooler come with a 34.5cm Height ABS Blower. This ensures great thrust of air throw. If you sit around the cooler you can feel the burst of air throw on your body.

HAVAI Protection Cooler Cover

The HAVAI Protection Cooler Cover is INCLUDED with the Opal XL Tower Cooler and are Anti-Bacterial and Water Resistant in nature. The cover ensures that the Tower Cooler has a long life.

Water Pipe with Cooler

The HAVAI Tower Coolers comes with Water Pipe that help fill water easily once attached to the Direct Float Valve. The Auto Valve mechanism in the cooler ensures that the water flow stops once the Air Cooler Tank is filled to the brim.

Premium 2 Side Honeycomb

The HAVAI Tower Coolers come with two superior 5090 Flute Honeycombs for extra cooling. 5090 Flutes are thicker than the usual honeycombs and have higher density of paper this ensures better cooling

Features: Bullet XL

Perfect for COMPACT SPACE

The HAVAI Tower Coolers are perfect for the corners of your homes. Always ensure cross-ventilation where the cooler is being used for best performance. Do not expect an Air Cooler to work like an Air Conditioner. An Cooler specifically throws cooler air and does not cool a room like an Air Conditioner. We as a responsible brand want to ensure that we keep people informed about our products.

Great Features with great height!

Apart from 34 Litre Tank Capacity and great air throw, Opal XL has a height of 3.8 feet thereby ensuring that the Air Throw is at the eye level when seated. With a sturdy ABS Base below you can move it around with great ease even when the tank is filled with water.

Dust Net for Protection

The Opal XL has two thick dense 5090 honeycomb pads for great cooling. To ensure that the Honeycomb Pads have longer life and a better performance we have provided filter nets on both sides. These nets have very small holes to ensure that apart from air nothing else goes into the Air Cooler

T.O.P ENABLED MOTORS USED FOR SAFETY

T.O.P ENABLED MOTORS

All our Air Coolers have motors that have Thermal Overload Protectors (TOP), this ensures safety as the motors switches off if there is any over-heating.

COMPLIMENTARY COMBO

3 PIN POWERCORD USED

All our Air Coolers come with 3 Pin Powercords to ensure safety first and also it helps that a 3 Pin fits well into the socket and does not come out or become loose over a period of time.

How does the HAVA! Air Cooler Work ?

It is really simple to get them working you really need to just plug and play keeping the following in mind

1. The first thing you do is fill water in the tank. This needs to be done before the Air Cooler is switched ON
2. Once you have filled the Water in the tank then put the powercord in the socket and switch it ON
3. Then put the knob on PUMP/COOL this will make the pump ON and will ensure the honeycomb to get wet
4. Once the Pads are wet put the other knob ON – High/Med or Low Speed as you desire – **BANG AND THE AIR COOLER IS ON FOR YOU TO ENJOY**

ALWAYS ENSURE THE AIR COOLER IS IN A VENTILATED ROOM WITH A WINDOW AND ITS BACK SHOULD NOT BE STUCK TO A WALL TO ENSURE PROPER CIRCULATION

Benefits of using HAVA! Air Cooler

- Low Consumption of Electricity – No need to worry about running huge bills
- Low Maintenance Cost – Over a period of time the cost to maintain HAVA! Air Cooler is very low
- Healthy – HAVA! Air Cooler does not circulate the same air in a room thereby being healthier for you

So, It's Not an Air Conditioner, Right? – HAVA! AIR COOLERS – WHAT TO EXPECT?

Correct! HAVA! Air Coolers work most effectively in hot, dry climates. HAVA! Air Coolers release a comfortable, cool breeze with the natural process of water evaporation. When warm air is drawn into the air cooler, the air is filtered through a wet honeycomb cooling medium, which absorbs heat and naturally cools and humidifies the air.
