Yes, you heard that right. The Simba comes INCLUDED with HAVAI Protection cover along with Cooler Water Pipe. With this Cooler Cover we want to ensure that your cooler has a longer life and with the Water Pipe we want to ensure that you have a hassle free water filling experience

Why the Simba Personal Cooler ?

We ensured that the Personal Cooler is packed with enough compelling features

- High grade ABS Front, Side and Top Panel
- The Electric Motor has Thermal Over Load Protector to ensure safety while the cooler is in use
- The Simba Personal Cooler comes with an Ice Chamber at the back
- Thick Dense 5090 Honeycomb Pad at the back for better cooling efficiency
- The Personal Cooler has an Air Delivery of 1200 m3/hr
- The Personal Cooler is equipped with 3 Pin ISI Power Cord ensuring the plugs fix well into the fuse

PLEASANT AIR DELIVERY UPTO 8 FEET

The Personal Cooler is compact and portable to ensure you can move it around to corners of your house or any other space and the elegant designs helps it double up as a showpiece

Super Features and Accessories with the Simba Personal Cooler

PLEASANT AIR DELIVERY UPTO 8 FEET

The HAVAI Simba Personal Cooler comes with Engineering ABS Front and has a great Air throw. If you sit around the cooler you can feel the burst of air throw on your body.

HAVAI Protection Cooler Cover

The HAVAI Protection Cooler Covers is INCLUDED with the Bullet Tower Cooler and are Anti-Bacterial and Water Resistant in nature. The covers ensures that the Tower Cooler has a long life.

Water Pipe with Cooler

The HAVAI Personal Coolers come with Water Pipes that help fill water easily once attached to the Direct Float Valve. The Auto Valve mechanism in the cooler ensures that the water flow stops once the Air Cooler Tank is filled to the brim.

Premium Dense Honeycomb Pad

The HAVAI Simba Personal Cooler comes with superior 5090 Flute Honeycomb Pad at the back for extra cooling. 5090 Flutes are thicker than the usual honeycombs and have higher density of paper this ensures better cooling

Features: Simba

Perfect for Spot Cooling

The HAVAI Simba Personal Cooler is perfect for spot cooling at homes. Always ensure cross-ventilation where the cooler is being used for best performance. Do not expect an Air Cooler to work like an Air Conditioner. An Cooler specifically throws cooler air and does not cool a room like an Air Conditioner. We as a responsible brand want to ensure that we keep people informed about our products

Great Features with great movement!

Apart from 20 Litre Tank Capacity and great air throw, Simba has an Ice Chamber where you can add Ice for added cool air throw.

Dust Net for Protection

The Simba has a thick dense 5090 honeycomb pad at the back for great cooling. To ensure that the Honeycomb Pad has a longer life and a better performance we have provided filter net. This net has very small holes to ensure that apart from air nothing else goes into the Air Cooler

T.O.P ENABLED MOTORS

All our Air Coolers have motors that have Thermal Overload Protectors (TOP), this ensures safety as the motors switches off if there is any over-heating.

3 PIN POWERCORD USED

All our Air Coolers come with 3 Pin Powercords to ensure safety first and also it helps that a 3 Pin fits well into the socket and does not come out or become loose over a period of time.

How does the HAVAI Air Cooler Work ?

It is really simple to get them working you really need to just plug and play keeping the following in mind

1. The first thing you do is fill water in the tank. This needs to be done before the Air Cooler is switched ON
2. Once you have filled the Water in the tank then put the powercord in the socket and switch it ON
3. Then put the knob on PUMP/COOL this will make the pump ON and will ensure the honeycomb to get wet
4. Once the Pads are wet put the other knob ON – High/Med or Low Speed as you desire – **BANG AND THE AIR COOLER IS ON FOR YOU TO ENJOY**

ALWAYS ENSURE THE AIR COOLER IS IN A VENTILATED ROOM WITH A WINDOW AND ITS BACK SHOULD NOT BE STUCK TO A WALL TO ENSURE PROPER CIRCULATION

Benefits of using HAVAI Air Cooler

- Low Consumption of Electricity – No need to worry about running huge bills
- Low Maintenance Cost – Over a period of time the cost to maintain HAVAI Air Cooler is very low
- Healthy – HAVAI Air Cooler does not circulate the same air in a room thereby being healthier for you

So, It's Not an Air Conditioner, Right? – HAVAI AIR COOLERS – WHAT TO EXPECT?

Correct! HAVAI Air Coolers work most effectively in hot, dry climates. HAVAI Air Coolers release a comfortable, cool breeze with the natural process of water evaporation. When warm air is drawn into the air cooler, the air is filtered through a wet honeycomb cooling medium, which absorbs heat and naturally cools and humidifies the air.
