# Feel Healthy, Happy, Relaxed

Breaking new frontiers in health, CBD (Cannabidiol) will make you feel uplifted but never creates a psychoactive effect. Known for its many health benefits, it can affect nearly every biological process. Opening pathways to help your brain work at a higher functionality and aiding in the activation of serotonin receptors, it can indirectly help avoid conditions such as stress, anxiety and insomnia. It is known to ease symptoms of conditions such as arthritis, inflammation and chronic pain. Using CBD helps give you a sense of well-being and the happy life you deserve.

## CBD PAIN RELIEF LOTION

500mg CBD

Lab+Blends CBD On-Target Pain Relief Lotion quickly goes to work at the site of the pain. Combining the powerful pain relievers of Menthol and Lidocaine, it delivers temporary relief from pain caused by sore muscles and joints, arthritis, backache, and strains. Pure Cannabidiol CBD Extract helps soothe the discomfort of sprains and overused muscles. This effective lotion contains Arnica Extract traditionally used to increase recovery from muscle pain, stiffness, swelling, and bruising. Range of motion and flexibility increases as pain decreases. The resulting comfort is quick, strong, and long-lasting.

**What It Contains:** 500mg CBD, Menthol 2.75% and Lidocaine 2.35%,

Water, Emulsifying Wax NF, Caprylic/Capric Triglyceride, Cannabis Sativa Seed Oil (Hempseed Oil), Sunflower Oil, Cetyl Alcohol, Phenoxyethanol and Ethylhexylglycerin, Pure Cannabidiol CBD Extract, TEA, Polysorbate 20, Arnica Extract, Carbomer, Sodium Hydroxide, EDTA, BHT.

## CBD PAIN RELIEF GEL

500mg CBD

Target the site of the pain with Lab+Blends CBD Triple Recovery Pain Relief Gel. Powerful pain relievers of Camphor and Menthol deliver temporary relief from pain caused by sore muscles and joints, arthritis, backache, and strains. Pure Cannabidiol CBD Extract helps soothe the discomfort of sprains and overused muscles. This concentrated gel contains Arnica Extract traditionally used to increase recovery from muscle pain, stiffness, swelling, and bruising. Hempseed Oil helps repair dry or irritated skin. Range of motion and flexibility increases as pain decreases. The resulting comfort is quick, strong, and long-lasting.

**What It Contains:** 500mg CBD, Camphor 3.5%, Menthol 3% Caprylic/

Capric Triglyceride, Sunflower Oil, Cannabis Sativa Seed Oil (Hempseed Oil), Silica, Synthetic Beeswax, Phenoxyethanol, Pure Cannabidiol CBD Extract, Arnica Extract, Caprylyl Glycol, BHT.

## CBD ECZEMA RELIEF CREAM

450mg CBD

Lab+Blends True Control Eczema Relief Cream uses 2% skin-protecting colloidal oatmeal to help relieve the critical symptoms of eczema such as itchiness, redness, dryness, and irritation. Pure Cannabidiol CBD Extract helps soothe the discomfort of irritated skin. Ceramide NG, an essential lipid found within the skin, aids in restoring moisture. Key ingredients assist in the relief of eczema and help restore a clear and healthy appearance. Intensive healing for extra-dry, chapped skin. Safe for daily use. Steroid and fragrance-free.

**What It Contains:** 450mg CBD, Colloidal Oatmeal 2%, Water, Emulsifying Wax NF, Caprylic/Capric Triglyceride, Sunflower Oil, Glycerin, Cetyl Alcohol, Cannabis Sativa Seed Oil (Hempseed Oil), Phenoxyethanol and Ethylhexylglycerin, Pure Cannabidiol CBD Extract, Polysorbate 20, Dimethicone, Ceramide NG, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, TEA, EDTA, BHT.

Natural flavor.

**What It Contains:** 630mg CBD, Olive Oil, Pure Cannabidiol CBD Extract, Sunflower Lecithin, Cannabis Sativa Seed Oil (Hempseed Oil), Sunflower Oil and Natural Flavors.

# Fighting Pain, Resolving Stress

- Hemp-derived, non-psychoactive CBD has been found to benefit individuals who suffer from chronic pain syndromes such as fibromyalgia, neuropathy and more. It helps to relieve aches and pains and release the tension that often causes pain to linger and grow.
- CBD helps support sustained pain relief, relaxation and relaxing sleep. Each product is made in a way that optimizes the naturally occurring terpenes, constituents, essential fatty acids and phytonutrients along with strict verification of active ingredient levels.
- Pain medications may not be taken for prolonged periods due to the damage they can inflict on the stomach, liver and kidneys. CBD is different since it has a remarkable safety profile, addressing pain at the site of the discomfort, decreasing pain signaling to the brain and promoting relaxation.
- Some use CBD as an adjunct to their pain medications and some have been able to eliminate many of their medicines completely. Non mind-altering and not habit-forming, you can use it whenever you need it without worrying about side-effects.

## Ask Your Professional to Include CBD In Your Treatment

Lab+Blends CBD professional products add more to your clinical care. Containing concentrated amounts of ground-breaking CBD combined with powerful pain relievers of Lidocaine, Menthol and Arnica, overall stress reduction and pain relief is enhanced.

### CBD MASSAGE BALM | 660mg CBD

Contains 660mg CBD combined with pain relievers of Lidocaine and Menthol for advanced pain management. Applying the rich benefits of CBD right to the areas of pain and discomfort allows the therapist to target the pain at its source.

### CBD MASSAGE CREAM | 408mg CBD

Contains 408 mg CBD combined with pain relievers of Lidocaine and Menthol for advanced pain management. Applying CBD can increase the natural levels of pain-relieving endocannabinoids, decrease inflammatory responses, and desensitize pain receptors.

### CBD MASSAGE OIL | 700mg CBD

Contains 700mg CBD in an omega-rich massage oil base of pure hempseed oil. Fighting pain at the site of the discomfort and decreasing pain signaling to the brain, it is not only an added benefit in a treatment product but a powerful way to deliver results as well.
