Assembly Instructions

Stackracks and Adapter Covers

Begin by coordinating covers and racks using charts provided. *Note: Only smaller StackRacks can be stacked upon larger ones.* Place covers over top of rack as illustrated. Lock (back bottom) lip of rack to (top rear) lip on adapter cover as illustrated in figure 1. Front rails will then sit one on top of the other. *Note: When stacking smaller racks on top of larger racks, it is possible to lock a rack across the seam of two covers to better align your set-up.*
