About Our Company

ProMediaGear – founded in 2009 by the Fudala brothers - Tom, Matt, and Derek - all engineering graduates from the University of Illinois at Chicago.

The brothers share 40 years of photo/video, and 60 years of engineering experience, designing, and manufacturing parts from simple brackets to aerospace equipment. Product design runs in their blood with their grandfathers making wagons, horseshoes and wood working tools in the early 1900s.

PMG designs and manufactures products in the United States using the finest materials and machining capabilities with high attention to detail.

It all started with a Flash Bracket
Tom and Matt were struggling to find a camera flash bracket that would fit their needs while shooting portraits, so they created their own, and Boomerang Flash Bracket was born. Once introduced to photographers, they loved it, and appreciated the quality, craftsmanship and ease of use.

Our Mission:

ProMediaGear was founded to provide photographers with excellent gear that will last a lifetime. We design and build products that are durable, intuitive and exciting to use. To learn more visit ProMediaGear.com today.

Why Choose ProMediaGear?

As photographers, we know that every piece of equipment is an investment. With that in mind, ProMediaGear was established to create high-quality products with a focus on research, development and craftsmanship.

* see website for more details.

Made in the U.S.A.
The PRO-STIX, 42-SERIES, 3 and 4 section Carbon Fiber Tripods for serious photographers. The 42-series features a precision machined truss apex for superior rigidity, function and style. Coupled with a 42mm diameter, 10X layer, carbon fiber legs we created the best in class weight to strength ratio of any comparable tripod! Available in 3 lengths with Flat Plate or 75mm and 100mm bowl options.

42 Series Core Features:

- T6061 Lightweight Aluminum Apex
- 42mm, 10x layer Carbon Fiber Legs
- 3 Angle Adjustments (22.5° / 50° / 78°)
- Tension Adjustable Leg Mechanism
- Spring Loaded Apex w/ Safety
- Interchangeable Mount
- Hardened Stainless Steel Spikes
- Spirit Level
- Max Load Capacity: 125 lbs.

TRB75 - 75mm Bowl Mount
The bowl mount quickly snaps into our PMG PRO Carbon Fiber Tripod series aluminum truss apex and converts the flat top plate into a 75mm bowl mount. Perfect for many video heads on the market today. (Sold Separately)

3/8-16 Top Thread Mount

Integrated Hook
The PRO-STIX, 42 and 34 SERIES, Carbon Fiber Monopods are a great additional to any photographer. Both feature 10x layer carbon fiber legs, aluminum leg collars and a stainless steel spike in the foot. Complementing each Monopod is a comfortable removable neoprene pad and wrist strap.

**42-SERIES** Monopods are designed around our 42mm carbon fiber legs and features an Arca Type Clamp Top. This allows for effortless connection to your lens plates and compatible camera plates. You can quickly add our #HM1 Monopod Tilt Head for a great combination. This clamp is not removable. To install a ball head or other device simply mount the device to an Arca compatible plate and install.

**34-SERIES** Monopods are designed around our 34mm carbon fiber legs and features a flat base with reversible 1/4-20 and 3/8-16 threaded adapters. The series also features the opportunity to remove the top flat base and substitute with our #C40 Arca compatible clamp, sold separately.
BH1 - Professional Mechanical Ball Head

The ProMediaGear #BH1 Ball Head was engineered for a bold entry into the crowded ball head category and is definitely a head turner. Our head is meticulous and elegant in design yet extremely simple in use with 1 large lock knob and no drop down slot.

### Core Features:
- Quick Release Arca-Type Clamp
- Over-sized Locking Knob
- Built-in Spirit Level (on side)
- 3/8-16 Mounting Threads
- Made in the USA
- 5-year warranty

BH50 Professional Ball Head 50mm

Core Features:

- Quick Release Arca-Type Clamp.
- Massive 50mm Ball
- Over-sized Locking Knob.
- Built-in Spirit Level (on side)
- 3/8-16 Mounting Threads.
- Made in the USA.
- 5-year warranty

BH50 shares a traditional ball head design, including quite a bit of PMG engineering. Unique large tension knob dominates the structure, and can be dialed in perfectly to just the right amount of grip. What set’s it apart is huge load capacity, and ability to customize the position of the panning knob to your liking.

### Model # Description Weight Load Capacity
BH50 50mm Ball head 1.5 lbs / 700 g 150 lbs / 68 kg

BH50 shares a traditional ball head design, including quite a bit of PMG engineering. Unique large tension knob dominates the structure, and can be dialed in perfectly to just the right amount of grip. What set’s it apart is huge load capacity, and ability to customize the position of the panning knob to your liking.
The Katana Gimbal Head provides the ultimate long lens support for the outdoor or sports photographer. It offers the highest degree of stability with effortless silky smooth movements enabling you to track an object with ease. Even the heaviest lenses can be balanced with no problem at all. It has even been used with the Sigma "Monster" 200-500mm f/2.8 lens weighing 50 lbs.

#GK, Katana

$750.00 Street Price
The Katana Jr. Gimbal Head was created to provide the ultimate marriage between size, weight and functionality. The Junior is able to support a 600mm Lens, yet is portable enough to be backpacked through the jungle at just 2.4 lbs! The truss design manufactured out of rigid T6061 Aluminum required the PMG team of engineers to program the CNC machines to their limits to produce a product we know you will love.

- (1) #SH1 Camera Holster System
- (1) #PBX3 Camera Mounting Plate
- (1) #PAH1 Bracket Adapter
- Weight: 15.5 oz / 440 grams

** Dual Kit Also Available #SH1BK2
What is a Bracket Plate?

ProMediaGear Bracket Plate SYSTEM

- Quickly mounts your camera to a tripod with Arca-Type design for compatibility
- Anti rotation features in plates prevent unwanted twisting on camera
- Wide selection for most professional cameras on the market
- Expand and Add on Flash Brackets, L-Brackets, Straps, Holsters etc.

Side Port Threads
Side port holes and threads attach additional accessories such as L-Brackets, Quick Release Handles, our popular Boomerang Flash Brackets and other PMG gear.
L-Brackets are essential when changing from landscape to portrait without adjusting composition.

#A10 Port Snag Protector (sold separately)

1/4-20 Accessory Mounts

- Two piece design with removable vertical plate (offset)
- Safety stops
- Machined Aluminum w/ Anodized scratch resistant finish
- Arca-Type for Compatibility with other Ball heads
- Made in the USA
- 5-year warranty

- Quickly Change from Portrait to Landscape
- No Recomposition Necessary

** Custom Fitted for Easy Battery Access **
Quick Release Strap System

Our #SS2 Quick-Release Strap System features a proven, industrial strength, locking system that allows the receiver to be flush with the compatible PMG Bracket Plate. The strap engages without any screws or adapters and is quickly removable. Let nothing get in the way of your creativity. The #SS2 is part of the PMG Camera Support System (PMG CSS).
