

## Elevate Arnold Designs Upload Instructions

1. Please have your child(ren) draw their picture on WHITE paper. After it is finished (and dry if they used markers!), please scan it using your flat bed scanner. Change the output to 600 dpi (preferred) or 300 dpi at a minimum. Multiple images should be scanned separately.

- 2a. After clicking on the Choose Image button, you'll see this pop-up. If you're adding a single picture, you can use Drag & Drop. If you're adding multiple pictures, please click Choose a Local File.

- 2b. Navigate to the folder your images are in. You can add multiple images at the same time by selecting the first one, then either hold Ctrl and select each one you want to add. Click open when you're done for all to be added at one time.

(Tip: If all of the pictures are in a row, you can select the first one, hold Shift and click the last one for all to be selected)
