# About

I am Marie Graff the owner and creative soul behind the Danish design company Kodanska. Kodanska, translating to 'Copenhagen Street' from Czech to Danish and is the name of the street in the heart of Prague where I lived with my family for four years.

Inspired by our life in Prague and my roots back in Denmark, I chose the name 'Kodanska' as a good way to tell my personal story, portray family values and ideas behind every design collection. Every single design has its own personal story.

I find inspiration in the history behind the high quality of handmade materials in Czech Republic, and my love for the colourful city of Prague combined with the simplistic Nordic design style. My focus is on shapes, colours, the quality of the process of handmade work, and the aesthetics of the final result.

# Havana Banana

## COLLECTION

Every single one of our designs has its own story. A story of craftsmanship and quality. The 'Havana Banana' collection is a series of mouth-blown products characterized by exceptional quality and a distinctive expression.

Our inspiration for the colour patterns originally came from seeing a sundress with a beautiful variety of yellow and brown nuances, which turned out to be our new Havana Banana colour. Under our production process the brown colour was by mistake mixed up with a green colour and all of a sudden, we had a whole new visual design. This colour combination turned out to be perfect as one of our colour lines for our Havana Banana bowls.

The colours in the 'Havana Banana' collection are in a category of their own. The collection is an extension of our Easter Egg collection launched in early spring 2021, where we chose to continue to develop the colours from the collection, which evolved into the 'Havana Banana' collection in four specially designed colours: Banana Split, Cotton Candy, Banana Green and Banana Pink - the product names are just as tempting as the design itself.

# Third Generation

## COLLECTION

The beautiful colours and dynamic spiral patterns of our new Third Generation collection bring a colourful and fresh aesthetic expression to the table setting. In the design process, we paid special attention to the size of the plate, because we wanted to create a plate that could be used for different types of meals. Over the past three months, we tested different prototypes and made continuous adjustments. One aspect we came to appreciate was the little raised edge, which proved highly practical for plating up larger servings. The raised edge also added to the aesthetic experience of the table, because it makes the pattern visible from the side. The result is a design that works equally well for breakfast, lunch, desert and dinner.

The new colourful plates come in a variety of expressions; all clearly reflecting the craftsmanship that goes into the unique products. "We soon discovered that if we mixed multiple colours, some of them would be burnt away by the heat, some would fade, and others would maintain their intensity. Actually, the original idea was to play with monochrome plates, but once we saw the interplay of the different colours we changed to a clear base and began to focus on how we create a unique expression with the colour blends and how they fade into one another.

# Flow

## COLLECTION

The Flow collection is an award-winning series as our Flow vase won the popular Danish Design Award "product of the year" at Formland trade fair in spring 2020. The collection is made in "free-hand", three layers of glass and no two products are alike - each and every Flow product is unique.

With our design process we had a desire to burn fabric into glass to explore a new and different expression.

But our ideas literally burned up, as textile and glass have different melting points. In partnership with our skilled glass blowers in Czech Republic, we were inspired by the process and our thoughts and ideas went in the direction of stripes, shapes and colours - and after a couple of technical adjustments the vases came out just the way we wanted them.

*"We love the artistic expression of our "Flow" collection and wanted to see if we could mix our two collections "Flow" and "Danish Summer". We did not want one collection to exclude the other; instead, we wanted to be able to combine them in order to create an artistic and personal home design expression that combines classic, wild and colourful elements".*

Our Flow collection is a new and innovative element in Nordic table setting. In combination with our classic Danish Summer glasses, they make for a lively expression with plenty of colour and personality.

# Danish Summer

## COLLECTION

Our popular Danish Summer collection is hand blown from the highest quality of glass from Bohemia, Czech Republic. The collection is inspired by the rainy Danish summer where the structure on the glass reflects drops of rain.

*"We love creating different table settings with a mix of colours. It's great to have this many colours to choose from - in this way, there will always be one that suits our mood. With a colour range from delicate pink to dark green, the collection can both contribute to the more distinctive interiors or create a relaxing atmosphere".*

Choose a single colour for a harmonious expression or mix and match the colours for a more bohemian look.

# Did you know that Kodanska:

- \* makes handmade quality products, therefore each product is one of a kind
- \* never compromises on quality, therefore we have as many as 6 quality checks that support our high quality requirements
- \* collaborates with small self-employed and specialised craftsmen in Prague. This is why all our products are produced within Europe.
- \* emphasizes decency and good business ethics as crucial elements in the Kodanska culture, which means that we keep our promises and are very responsive to our partners
- \* increases circular production by reusing excess residues from previous collections to recreate new products, like our new scented candles
- \* makes lifetime products from natural quality materials so that our products can be passed on for generations
- \* always produces small collections, i. a. to prevent an overproduction and waste
- \* ensures increased transparency by involving our customers in our processes, right from our design process to the actual production
- \* considers our glassblowers as an integrated part of the Kodanska team, and therefore organize our production so that they have continuous work throughout the year
- \* has developed environmentally friendly and plastic-free product boxes that have been re-designed in smaller sizes so that we can increase the volume of products when shipping
- \* always make our designs in collaboration with our glassblowers and the actual design process often last a year
- \* always weighs quality over discount, therefore we pay our manufacturer the same amount per product, whether this is one product or 100 products, as we do not work with quantity discount
- \* ensures that our customers help to define our business, as we develop in line with our customers' wishes and needs
