#### FORE WORD

The one dominating idea back of "Union Special" is to build the best industrial sewing machines in the world. Our new line of Enclosed Type Flat Bed Machines, known as the "Fifty-Thousand Series" marks an epoch in sewing machine design and construction.

All parts are made to gauges with exceedingly close limits. Oil Cups are provided for all important bearings, and a convenient oil drain catches the surplus. Repairs can be made with facility, as all parts are readily accessible, and are 100% interchangeable.

It is our constant aim to furnish carefully prepared information that will enable the customer to secure all possible economies and advantages from the use of Union Specials. On the pages which follow will be found illustrations and descriptions of the parts for styles in Classes 52700, 52800, 52900, 53500.

Additional catalogs, containing information relative to these machines, and which will be furnished on request, are listed below.

Catalog No. 29 Catalog No. 45 List of Transmitter Parts List and Description of Needles

Catalog No. 45 A Form 357

Price List of Needles
Engineering Department Adjusting Instructions. Specify the
Style number of the machine
for which the adjusting instructions are required

In all manufacturing centers will be found Union Special representatives, who will co-operate with those who desire in planning and estimating their requirements.

UNION SPECIAL MACHINE COMPANY

Engineering Department

#### IDENTIFICATION OF MACHINES

Each Union Special carries a style number which is stamped in the name plate on the machine. Style numbers are classified as standard and special. Those which are standard have one or more letters suffixed, but never contain the letter "Z". Example: 52700 A. Style numbers which contain the letter "Z" are special. When only minor changes are made in a standard machine a "Z" is merely suffixed to the respective standard style number. Example: 52700 AZ.

Styles of machines similar in construction are grouped under a class number which differs from the style number in that it contains no letters. Example: 52700.

The overall width of the stitch in Classes 52700 and 52800 machines is represented by a gauge number measured in 64ths. of an inch, viz: 16 gauge represents a stitch measuring 1/4 inch wide.

The distance between the needles perpendicular to the line of feed in Class 52900 machines is represented by gauge numbers measured in 64ths. of an inch. The number following the first hyphen (-) represents the distance between the left and middle needle and the number following the second hyphen (-) represents the distance between the middle and right needle, viz: 52900 A-5-8 gauge represents a distance of 5/64 inch between the left and middle needle and 1/8 inch between the middle and right needle.

The distance between the rows of stitches in Class 53500 machines is represented by a gauge number measured in 64ths. of an inch, viz: 16 gauge represents a distance

of 1/4 inch.

#### APPLICATION OF CATALOG

This catalog applies only to the standard styles of machines as listed herein. It can also be applied with discretion to the special machines in these classes.

#### STYLES OF MACHINES IN CLASS 52700

- Enclosed Type Flat Bed Two and Three Needle One Looper Machines, External Presser Spring, Shielded Disc Take-up
- 52700 A (Succeeds 6900 H) For making belt loops for trousers, overalls, bathrobes, and similar garments; stitch Type 406, strips used in short lengths, non-differential feed, needles Type 126, standard gauges Nos. 12 and 16.
- 52700 B For hemming sides and bottoms of bathrobes made from woven fabrics, with fabric folded next to feed dog; stitch Type 406, adjustable folder which turns in from 1/2 to 1 inch of fabric, non-differential feed, needles Type 126, standard gauges Nos. 12 and 16.

#### STYLES OF MACHINES IN CLASS 52700- (Cont'd)

- 52700 F For attaching elastic in long lengths to full fashioned hosiery; three needle stitch Type 407, wrench adjustment tandem differential feed, needles Type 121, standard gauge No. 12.
- 52700 G For attaching elastic bands 7/8" to 2" wide, in long lengths, garment lengths, or with ends joined, to flat knit, warp knit and rib knit light weight garments made from rayon, silk, cotton, and wool; three needle stitch Type 407, non-differential feed, needles Type 121, standard gauge No. 16.
- 52700 H For attaching elastic bands 3/8" to 1 1/4" wide, in long lengths, garment lengths, or with ends joined, to flat knit, warp knit and rib knit light weight garments made from rayon, silk, cotton, and wool; twin needle stitch Type 406, non-differential feed, needles Type 121, standard gauges Nos. 8, 12 and 16.
- 52700 Z A special style, similar to the standard styles in Class 52700, but differing in some of its component parts.

#### STYLES OF MACHINES IN CLASS 52800

- Enclosed Type Flat Bed Four and Five Thread Interlock Machines, Stitch Types 602 and 605, Lateral Looper Travel, External Presser Spring, Shielded Disc Take-up
- 52800 B (Succeeds 5100 H) For attaching cuffs to knitted undergarments; one operation lap seam, Five Thread Interlock Stitch Type 605, three needles, wrench adjustment off-set differential feed, needles Type 121, standard gauge No. 16.
- 52800 D (Succeeds 5100 G) For seaming medium and heavy weight undergarments; one operation lap seam, Five Thread Interlock Stitch Type 605, three needles, three-section bottom presser foot, wrench adjustment tandem differential feed, needles Type 121, standard gauge No. 16.
- 52800 E (Succeeds 13100 F) For attaching split tube border to neck and armholes of athletic shirts made from light weight knitted cotton and rayon fabrics; Four Thread Interlock Stitch Type 602, two needles, long length light weight flat knit strip, cut parallel with wale, wrench adjustment off-set differential feed, folder has 3/64 inch capacity, needles Type 121, standard gauge No. 8, standard finished widths 7/16, 1/2, 5/8, and 3/4 inch.

#### STYLES OF MACHINES IN CLASS 52800 (Cont'd)

- 52800 F (Succeeds 13100 C) For attaching split tube border to union suits, vests, step-ins, chemises, and similar garments made from light weight knitted cotton and rayon fabrics; Four Thread Interlock Stitch Type 602, two needles, long length light weight flat knit strip cut parallel with wale, wrench adjustment off-set differential feed, folder has 3/64 inch capacity, needles Type 121, standard gauge No. 8, standard finished widths 1/2, 5/8, 3/4, 7/8, and 1 inch.
- 52800 G (Succeeds 13100 B) For attaching knitted tubing and previously made lace, to knitted undergarments; lap seam, Four Thread Interlock Stitch Type 602, two needles, wrench adjustment tandem differential feed, needles Type 121, standard gauge No. 8.
- 52800 H (Succeeds 5000 L) For attaching collarettes to knitted undergarments; Four Thread Interlock Stitch Type 602, two needles, long length rib knit strip cut perpendicular to the wale or parallel with the wale, wrench adjustment off-set differential feed, folder has 1/16 inch capacity, needles Type 121, standard gauge No. 12, standard finished widths 3/4, 7/8, 1, and 1 1/4 inches.
- 52800 J (Succeeds 5000 C) For the second part of the two operation process of attaching garment length collarattes to knitted undergarments; Four Thread Interlock Stitch Type 602, two needles, wrench adjustment tandem differential feed, needles Type 121, standard gauge No. 12.
- 52800 K For attaching collarettes to knitted undergarments; Five Thread Interlock Stitch Type 605, three needles, long length rib knit strip cut perpendicular to the wale or parallel with the wale, wrench adjustment off-set differential feed, folder has 1/16 inch capacity, needles Type 121, standard gauges Nos. 14 and 16, standard finished widths 3/4, 7/8, 1, and 1 1/4 inches.
- 52800 Z A special style, similar to the standard styles in Class 52800, but differing in some of its component parts.

#### STYLES OF MACHINES IN CLASS 52900

Enclosed Type Flat Bed Three Needle Machines, Two Loopers, Left Needle in Rear, Dual Stitch, Double Locked Type 401 on Left and Four Thread Interlock Type 602 on Right, Vertical Trimming Mechanism, External Presser Spring, Shielded Disc Take-up

- 52900 A For simultaneous seaming and overedging of garment pockets, and similar articles, with the exclusive Union Special "Safety Stitch", needles Type 126, standard gauge No. 5-8.
- 52900 B For simultaneous seaming and overedging of street and house dresses, coat linings, pillow cases, and similar articles, with the exclusive Union Special "Safety Stitch", needles Type 126, standard gauges Nos. 5-8, 16-8.
- 52900 Z A special style, similar to the standard styles in Class 52900, but differing in some of its component parts.

#### STYLES OF MACHINES IN CLASS 53500

- Enclosed Type Flat Bed Machines, Two Motion Ruffling Mechanism, Double Locked Stitch Type 401, Lateral Looper Travel, External Presser Spring, Single Disc Take-up
- 53500 C (Succeeds 9800 S) For attaching ruffles to lace curtains and similar articles; two needles set abreast, diagonal looper travel, continuous ruffling mechanism with knee press control for increasing fullness at corners, needles Type 106, standard gauge No. 16.
- 53500 D Without knee press control for increasing fullness at corners; otherwise same as 53500 C, standard gauge No. 16.
- 53500 Z A special style, similar to the standard styles in Class 53500, but differing in some of its component parts.

#### NEEDLES

#### TYPE NUMBERS AND SIZES

Each needle has a type number and size number. The former denotes the kind of shank, point, length, groove, finish, and other details. The latter denotes the largest diameter of the blade, measured in thousandths of an inch midway between the shank and eye, and is stamped in the needle shank. Collectively, the type number and size number is the complete symbol.

To have orders promptly and accurately filled, the empty package, a sample needle, or the type and size numbers should be given. See marks on packages. An intelligent order would read as follows \*1000 Needles Type 121 Size 032".

#### NEEDLES

TYPE NUMBERS AND SIZES (Cont'd)
The type numbers of the needles most commonly used in the styles of machines covered by this catalog are listed below. Set opposite each type number is the description of the needle and the sizes available.

#### Description Type No. 101 Round shank, round point, extra short, double groove, nickel plated- sizes 019, 022, 025, 027, 029, 032, 034, 036, 038, 040, 042, 044, 046, 049, 101 G Same as Type 101, except finish is chromium platedsizes 032, 036, 040. 106 Round shank, round point, extra short, double groove, ball eye, standard length blade, nickel plated- sizes 027, 029, 032, 036, 038, 040, 042, 044, 049. 106 A Same as Type 106, except blades are 1/16 inch shorter and shanks are 1/16 inch longer- sizes 032, 036. 106 G Same as Type 106, except finish is chromium plated- sizes 032, 036, 040, 044. 121 Round shank, round point, short, double groove, nickel plated- sizes 019, 022, 025, 027, 029, 032, 036, 038, 040, 042, 044, 049, 054. Same as Type 121, except finish is chromium 121 G plated- sizes 032, 036, 040, 049. 124 Round shank, round point, short, double groove, spotted, nickel plated- sizes 040, 044, 049. 126 Round shank, round point, short, double groove, ball eye, nickel plated- sizes 027, 032, 036, 040, 042, 044, 049, 054. 128 Round shank, round point, short, double groove, ball eye, spotted, nickel plated, standard length blade, standard width of eye and grooves- sizes 032, 036, 040, 044, 049, 054.

- 128 F Same as Type 128, except the width of the eye and grooves are under-size one step reduction- sizes 044, 049, 054.
- Same as Type 128, except the width of the eye and grooves are under-size one step reduction, and finish is chromium plated- sizes 044, 049, 054.

#### NEEDLES (Cont'd)

Type No.

128 GA Same as Type 128, except finish is chromium platedsizes 040, 044, 049, 054.

Round shank, spear point, short, double groove, ball eye, spotted, nickel plated, standard length blade, standard width of eye and grooves- sizes 044, 049, 054.

APPLICATION OF TYPE NUMBERS TO MACHINES

The standard type of needle applicable to each style is listed in the description of each style. The styles of machines covered by this catalog are listed below. Set opposite each style number is the type numbers of the needles that can be used. Type numbers are arranged numerically, as the variety of the materials sewed on each machine makes it impractical to show a preference.

Machine Style	Type of Needles
52700 A	121, 121 G, 124, 126, 128, 128 F, 128 G, 128 GA, 929.
52700 B	121, 121 G, 124, 126, 128, 128 F, 128 G, 128 GA.
52700 F	121, 121 G.
52700 G	121, 121 G.
52700 н	121, 121 G.
52800 B	121, 121 G.
52800 D	121, 121 G.
52800 E	121, 121 G.
52800 F	121, 121 G.
52800 G	121, 121 G.
52800 Н	121, 121 G.
52800 J	121, 121 G.
52800 K	121, 121 G.
52900 A	126, 128, 128 F, 128 G, 128 GA, 929.
<b>52</b> 900 B	121, 121 G, 126, 128, 128 GA, 929.

#### NEEDLES (Cont'd)

#### APPLICATION OF TYPE NUMBERS TO MACHINES (Cont'd)

Machine Style Type of Needles

53500 C 101, 101 G, 106, 106 A, 106 G.

53500 D 101, 101 G, 106, 106 A, 106 G.

#### ORDERING REPAIR PARTS

#### PLATES

Grouped, according to scale, will be found illustrations of parts similar in appearance, and, to some extent, component parts that go in the same subdivision of the mechanism.

When a given design of part is made in two or more sizes, only one illustration is usually shown. In ordering these pieces it is necessary that the additional information be furnished as requested under these illustrations.

#### LIST OF PARTS

Turning from the plates to the list of parts, the description of each part and its principal uses will be found. Always check the symbol against its description before ordering. It is not necessary to furnish the plate number.

When a part is used, or can be used, in all machines covered by this catalog, no specific use is mentioned in the description.

For convenience in ordering, minor parts such as screws, nuts and similar articles are repeated after each major part.

(-) A dash in the "plate number" column of the list of

parts indicates the absence of an illustration.

(1) A double dagger in the "symbol to order by" column indicates that the component parts cannot be furnished separately. Due to the high speed of these machines it is impossible for these associated parts to be fitted a second time and make a serviceable job.

#### IDENTIFYING PARTS

Where the construction permits, each part is stamped with its part number. Some of the smaller parts are stamped with an identification letter to distinguish them from parts similar in appearance.

All part numbers represent the same part, regardless of the catalog in which they appear.

#### SUPPLIES

All supplies, including taps, reamers, belting, belt hooks, belt fasteners, screw drivers, wrenches and powdered oil stone will be promptly furnished.

#### ORDERING REPAIR PARTS (Cont'd)

#### USE GENUINE NEEDLES AND REPAIR PARTS

Success in the operation of these machines can be secured only by the use of genuine Union Special Needles and Repair Parts as furnished by the Union Special Machine Company, its subsidiaries and authorized distributors. Obviously, it is to our interest to maintain the reputation of Union Specials by furnishing the very best goods obtainable. They are designed according to the most approved scientific principles, and are made with the utmost precision. The maximum efficiency and durability are assured.

Genuine needles are put up in packages marked at the top "Trade 'UNION SPECIAL' mark". Genuine repair parts are stamped with a reproduction of the well known two padlocks with a link connecting the shackles. Both trade marks are symbolic of superlative excellence. All other needles and parts are bogus.

#### TERMS

Prices are strictly "net cash" and subject to change without notice. All shipments are forwarded at the buyer's risk, f.o.b. shipping point. Parcel post shipments are insured, unless otherwise directed. A charge is made to cover the postage and insurance.
