Important Notice to Customers

THE PARTS LISTED in this catalog are furnished at list prices, subject to change without notice, for repairs only.

Attention is hereby called to the fact that many of said parts are subjects of patents, or enter into patented combinations, and that in furnishing these parts at list prices we only license their use for repairing machines of our own make, in their original condition.

Notice is hereby given that the sale of such parts by the purchaser, or the use thereof for changing over machines from one style to another, or for any other than BONA FIDE repair purposes, is an infringement, for which the seller or user will be liable to prosecution.

Contents

The matter of this catalog relates only to machines in Class 7800, and cannot be applied to other classes. Puller parts and power transmitter parts are listed in two separate catalogs, Nos. 32 and 29 respectively, copies of which will be supplied upon request.

Description of Machines

A NAME PLATE is attached to each machine on which is stamped the class number. The class number represents the general type of machine.

THE STYLE is indicated by the letter following the class number and is given only in the catalog. It represents a sewing machine fitted to meet a specific condition.

THE GAUGE NUMBER of two needle machines represents the space between the rows of stitching.

The spacing of gauges is as follows:

| Gauge No. | Space | Gauge No. | Space | Gauge No. | Space |
|-----------|-----------------|-----------|------------------|-----------|----------------|
| 5 | 9/32 inch | 6 | 13/32 inch | 48 | 3/4 inch |

Styles of Machines in Class 7800

Large Arm Flat Bed Two Needle Miscellaneous Machines, Two Under Threads,
Left Hand Needle In Front, Long Needles

Style

7800 A—For lap seaming selvage edge tent and awning work; a folder for raw edge work will be furnished gratis, if the need is urgent (specify gauge of machine).

7800 B—For double lap seam felling tent and awning work; a guide for selvage edge work will be furnished gratis, if the need is urgent (specify gauge of machine and catalog number of folder).

7800 C—For lap seaming selvage edge tent and awning work; WITH PULLER, a folder for raw edge work will be furnished gratis, if the need is urgent (specify gauge of machine).

7800 D—For double lap seam felling tent and awning work; WITH PULLER, a guide for selvage edge work will be furnished gratis, if the need is urgent (specify gauge of machine and catalog number of folder).

Needles

ORDERING To simplify the ordering of needles, we have adopted a plan by which "TYPE" numbers will represent the full description of needles with the exception of the size of the blade.

New "SIZE" numbers are also given which represent the size of blade in thousandths part of an inch.

When ordering needles it is only necessary to give the "TYPE" numbers, the new "SIZE" numbers and the amount required.

Machines in Class 7800 use Type 143 Needles. (Round Shank, No. 2 Bag, Double Groove, Round Point.)

Success in the operation of our machines can be assured only by the use of genuine Union Special needles, furnished by the Union Special Machine Company. Obviously, it is to our interest to maintain the reputation of our machines by furnishing the very best needles obtainable.

TERMS Prices on needles are strictly net. Leaving the factory in perfect condition, packed with skillful care, they are forwarded at the buyer's risk, f.o.b. Regular postage rates will be charged on all needles sent by parcel post. To safeguard against loss in the mail, parcel post packages will be insured at the buyer's expense when so requested in the order.

VIEW OF NEEDLE, TYPE 143.

| Type Number | New Size No. | Old Size No. | DESCRIPTION | Price per M ¹ |

| 143 | 090 | 9 | " " " " " " " " | 26.00 |
| 143 | 100 | 10 | " " " " " " " " | 27.50 |
| 143 | 140 | 14 | " " " " " " " " | 33.50 |

Illustrations and List of Parts for Repairs Only

PLATES Grouped according to scale will be found illustrations of parts similar in appearance and, to some extent, component parts that go together in the same subdivisions of the mechanism.

LIST OF PARTS Turning from the plates to the list of parts, will be found the parts numbers, plates they appear on and their names. Only the actual name of the part is given, as it was our aim in making up this catalog, to make it as concise as possible.

(‡) A double dagger in the "number to order by" column indicates that the component parts cannot be furnished separately.

(*) A star in the "number to order by" column indicates that the part can only be furnished upon return of the broken or worn out part. We are forced to adopt this rule because of the difficulty of protecting our customers and ourselves against improper use of these particular parts, which, like others, are furnished at list prices for repairs only.

ORDERING GOODS A large number of parts have their full numbers stamped upon them. Other parts, difficult to distinguish, are marked, instead, with identification letters. If customers furnished the number stamped on a piece, errors will be avoided, and we shall be enabled promptly to duplicate the desired part. All part numbers represent the same part regardless of the catalog in which they appear. All supplies, including oil, belting, belt fasteners, taps, reamers, screw drivers and powdered oilstone, will be promptly furnished.

TERMS Attention is directed to our established practice. Prices on parts and supplies are strictly net. Being shipped in perfect condition, packed with skillful care, they are forwarded at the buyer's risk, f.o.b. We cannot be responsible for delivery of mail packages. Regular postage rates will be charged on all goods sent by parcel post. To safeguard against loss in the mail, parcel post packages will be insured at the buyer's expense when so requested in the order.
