1 Place the mask in your hands with the top side facing upwards.

2 Put on the protective mask and press the metal part on the bridge to the shape of your nose.

3 Pull the bottom of the mask slightly down so that the nose, mouth and chin are well covered.

4 Check the fit of the mask so that no secondary air is drawn in. Check facial hair for air leaks. If necessary, correct the fit until the mask fits comfortably and seals correctly.
