

Ananta Class

Design Sergio Bicego

Anno di produzione 2000

Production year 2000

Restyling 2016

[It] — Ananta Class è un sistema informale, libero e versatile che permette infinite composizioni grazie agli schienali indipendenti e alle basi da 80, 120, 160, 200 e 240 cm accostabili tra loro. Il progetto, il cui nome rimanda al concetto di infinito, parte dalla semplificazione costruttiva: le sedute, libere dai vincoli dei braccioli e delle schiene, si riorganizzano negli spazi adeguandosi alle esigenze. Il progetto è completato da un tavolino disponibile in due misure. Il supporto con finitura cromo nero sostiene un piano disponibile con impiallacciato noce canaletto o rivestito in cuoio rigenerato. Un modo nuovo, democratico e contemporaneo di subordinare l'oggetto alla centralità dell'uomo. Completamente sfoderabile.

Struttura

In legno imbottito con poliuretano espanso a quote differenziate (21IP - 25P - 30P - 40IP), rivestito con velfodera accoppiata con resinato 200gr/mq. Il molleggio della seduta è assicurato da cinghie elastiche con anima in polipropilene.

Piedini

I piedini delle basi sono in ABS mentre i piedini della schiena sono in finitura black nichel.

Imbottitura

I cuscini dello schienale sono imbottiti con piuma d'oca lavata e sterilizzata e fibra di poliestere 100% suddivisa a scomparti. Ananta Class propone due tipi di sedute: versione piuma e versione espanso.

Versione in piuma

I cuscini della seduta sono realizzati in piuma d'oca lavata e sterilizzata suddivisa in scomparti e rivestita con tessuto di cotone bianco 100% con anima in poliuretano espanso a quote differenziate (30IP e 35IM).

Versione in espanso

I cuscini seduta sono imbottiti in poliuretano espanso a quote differenziate (30IP e 25IM), rivestiti con vellutino accoppiato a dacron 380gr/mq.

[En] — Ananta Class is an informal, modular and versatile range that allows endless combinations of the independent backrests and bases available in 80, 120, 160, 200 and 240 cm lengths. The collection, whose name evokes the concept of infinity, is based on the idea of simple construction: free from constraints of the armrests and backrests, the seating can be arranged to suit individual needs. It is completed with a side table available in two sizes. The black chrome structure holds up a table top available in walnut veneer or regenerated leather.

The line offers a new, democratic and modern way of relating objects to people's lifestyles.

Fully removable covers.

Structure

In wood padded with variable-density polyurethane foam (21IP - 25P - 30P - 40IP), covered with velfodera on a resin-coated backing 200gr/sqm. The seat is sprung with elastic straps reinforced with polypropylene.

Feet

The bases have feet in ABS while the feet of the backs are in black nickel finish.

Padding

The back cushions are padded with washed and sterilized goose down and 100% polyester fiber divided into sections. Ananta Class proposes two kinds of seats: feather and polyurethane foam versions.

Feather version

The seat cushions are filled with washed and sterilized goose feather divided into sections and covered with white 100% cotton fabric with a variable-density polyurethane foam core (30IP and 35IM).

Foam version

The seat cushions are padded with variable-density polyurethane foam (430IP e 25IM), covered with fine velvet coupled with dacron 380gr/sqm.
