

ALUMINIUM BED/BED LACQUERED

Bruno Fattorini
1997

NEW
New finishes, matt painted white, red and black.

Beds in various versions:

- sommier in height 30 cm.
- with headboard: 65 cm high, "plain contour" without panel.
- sommier with canopy (canopy in height 210 cm).

Sizes

Widths range from one metre to 210 cm, with a fixed length: 210 cm. Maximum available length 220 cm (slats usable length 210 cm). Unmodifiable heights of headboards: 30 or 65 cm.

Special sizes for slats and frame are available, in multiples of 10 cm, except for canopy versions, with a longer lead time.

Special sizes both in width and in length require a longer lead time and a 30% extra charge on the next regular size up. As to length only, the extra charge stands at 15% on the price of the ordered dimension.

For lead time, please contact our Sales Department.

Slat bases

Load-bearing orthopaedic platform in tubular steel with 40x30mm section, powder coated finish.

Fixed structure, with slats in laminated beech thickness 8 mm, width 70mm and fitted with regulating cursors. Moving the cursors along the length of the slats allows to adjust rigidity in the lower back area and adapt the bed to needs of the person and the shape of the body.

It is not possible to use single slat bases for double beds.

NOTE

The use of the MDF Italia bedslats is compulsory. The slat base and the mattress are not included in the bed price.

Mattresses

For mattresses, please refer to the last pages of the "beds" section.

For further information about specs, please refer to the technical section at the end of the price list (tables of materials/colours).

bed sizes cm	slat sizes cm
100 x 210	90 x 200
150 x 210	140 x 200
160 x 210	150 x 200
170 x 210	160 x 200
180 x 210	170 x 200
190 x 210	180 x 200
210 x 210	200 x 200

Overall sizes shown are nominal; the real dimensions are - 1.5cm in both length and width. (eg 100x200 = D 98.5 L208.5)

MATTRESSES

MATTRESSES

MDF Italia offers 4 typologies of mattresses in 3 different dimensions: 160x200 cm, 180x200 cm and 200x200 cm.

Removable linings

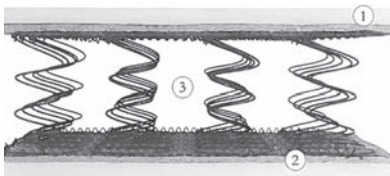

In removable linings, the mattress will be protected by a jersey cotton cover that upholster completely the inner structure

“CLIMA” MATTRESS (H20 cm)

Orthopaedic Bonnell biconical spring mattress made of hardened and phosphatised steel (Ø 2,2 mm, 360 springs measuring 170x200 cm). The spring structure is upholstered by a Polyurethane foam sheet, medium density, CFC free and non-yellowing property. Between the spring structure and the PU foam sheet, there is a “Sound-dampening needle punched” reinforcement felt.

The covering feature is fixed and the fabric treated with Sanitized® anti-mite system. The fixed covering features “air-conditioning” of the padding by using wool on the winter side and cotton on the summer side. Mattress suitable for all non-soft bases, except for those with movement.

- 1- Polyurethane foam sheet, CFC free, non-yellowing, medium density.
- 2- Sound absorbent reinforced needle-punched felt.
- 3- Bonnell biconical springs structure in hardened and phosphatised steel wire Ø 1,8 mm (head / foot area) and Ø 2,0 mm (lower back area).

“COMFORT” MATTRESS (H20 cm)

“Individually Boxed” spring mattress that provides exceptional standard of comfort due to:

- Springs are independent and “individually boxed”.
- Springs sections are divided into differentiated-support sections.

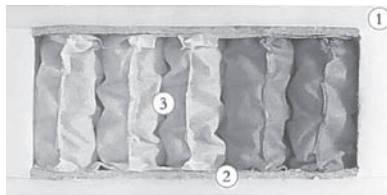

Springs made of hardened and phosphatised steel are Ø 2,0 mm in the centre part of the mattress, and Ø 1,8 mm for the head and feet zone.

This suggest that the weight of the body is perfectly distributed over the entire surface of the mattress, which adapts to the curves of the human body.

The “Individually Boxed” spring structure is covered with a “white sound-dampening needle punched” reinforcement felt, that has been completely upholstered by a PU foam sheet, CFC free, non-yellowing and medium density.

The covering feature is removable and the fabric treated with Sanitized® anti-mite system.

Mattress suitable for all bases, including those with movement and tilting up to 40°.

- 1- Polyurethane foam sheet, CFC free, non-yellowing, medium density.
- 2- Sound absorbent reinforced needle-punched felt.
- 3- Individually boxed springs in hardened and phosphatised steel wire Ø 1,8 mm (head / foot area) and Ø 2,0 mm (lower back area).

“COMFORT PLUS” MATTRESS (H25 cm)

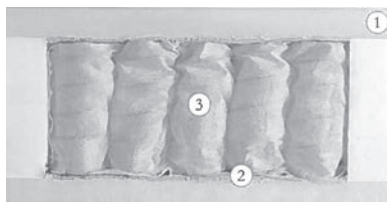

“Individually Boxed” spring mattress with a “Box System” combined to the structural cover made of Perforated MIND FOAM visco-elastic sheet in thermal sensitive material, that guarantee an excellent comfort whatever is the position.

The “Box System” structure provides springs made of hardened and phosphatised steel wire, Ø 1,8 mm and height 13 cm (830 springs in 170x200 cm).

Between the Boxed structure and the MIND FOAM sheet (h = 4 cm), there is a “White sound-dampening needle punched” reinforcement felt.

The covering feature is removable and the fabric treated with Sanitized® anti-mite system.

Mattress suitable for all bases, including those with movement and tilting up to 40°.

- 1- Perforated MIND FOAM visco-elastic sheet (H4 cm).
- 2- Sound absorbent reinforced needle-punched felt.
- 3- Individually packed springs with a “Box System” structure in steel wire Ø 1,8 mm (H13 cm).

“FORMA” MATTRESS (H18 cm)

Mattress made of a mono-bloc of an “ecological” product, called Waterlily™. The cellular structure of Waterlily™ enables the mattress to transpire, avoiding any retention of heat and humidity.

Depending on the person’s weight, the most suitable Waterlily™ support could be calibrated, thereby obtaining a customised mattress. Consequently, always indicate the user’s weight when buying the mattress.

The covering feature is removable and the fabric treated with Sanitized® anti-mite system.

Mattress suitable for all bases, including those with movement and tilting up to 40°.

1- Waterlily™ Monobloc (H16 cm)

SANITIZED

Products made with Sanitized® fibres raising the live-comfort for allergy-sufferer and asthmatics. Sanitized® imparts a reliable effect against dust mite and a large number of bacteria and fungi. Due to the effectiveness of Sanitized®, dust mites and germs are deprived of their nutrients and can no longer proliferate. The used active substances of Sanitized® are tested for skin reaction according to the OCED-Guidelines and classified as a non-sensitiser. Sanitized® fibres do not contain TBT. So, these fibres are harmless for man. The active substances are incorporated (inside the fibre, like spun-dyes), no chemical treatment. So is fully washable and the effect is permanent.

MATTRESSES

MIND FOAM

This product was originally developed by NASA, at first for scientific requirements and subsequently used for mass production with high technological content. The manufacturing company, which is always attentive to the innovative uses of polyurethane, decided to produce this viscoelastic foam with the "SHAPING" process, which has slow memory and high density, ideal as support for seats and mattresses due to its conforming effect. The mattress made of mind foam is a newly developed product made of polyurethane foam with the particular deformability and slow return characteristics, with the resilience value close to zero, the foam perfectly assumes the shape of the body that must be supported in order to allow a customised rest according to the physical needs of each person. MIND FOAM for its characteristics, is particularly suitable as a product to prevent bedsores in the health sector.

WATERLILY™

Waterlily™ has a structure formed by tiny cells communicating with each other that allow air to pass freely through the mattress. Its breathable action disperses heat and humidity maintaining the ideal temperature, thus avoiding the proliferation of mites and the onset of allergies. Waterlily™ also has a beneficial effect for the skin that awakes fresh and rested after a good relaxing night. Laboratory tests have shown how Waterlily™ is a top of the range product, a material capable of providing all the best features required by the market in terms of breathability, comfort and durability.

UK MARKET

NB. Upon request we can offer the mattresses of the Millor H20 line suitable for the UK market. Please check for feasibility, prices and delivery times with our sales department.
