

FLOW CHAIR IROKO outdoor

Jean Marie Massaud
2020

INDOOR / OUTDOOR

Flow Chair Iroko is the new chair in the Flow collection for outdoors. It also meets the various design needs for contract, hospitality, and catering settings.

Mass-pigmented shell (gloss outside)

The shell, made from polycarbonate through injection moulding, is mass-pigmented in the colours white or black and has a standard double finish: gloss outside, and microgoffered inside.

Base

The 4 legged base is made of solid Iroko, a very dense African wood, highly resistant to bad weather, light and extremes of temperature. A characteristic of this wood is its smooth, even surface. All parts made of Iroko are treated using an exclusive varnish, specifically for outdoor use. Unlike the times when oil treatment was used, this finish does not require continuous maintenance.

The hook support is made of aluminium and is painted white or graphite grey, and comes in the same colour as the white or black shell. Swivel 360°.

Outdoor use

Any material left outdoor, even if properly treated, due to the action of weathering, can have superficial molecular and colour changes during its lifetime. Of course the amount of alteration is directly related to the amount of exposure to weather and to the geographical area. Regular maintenance, for instance periodic cleaning with water, increases resistance to corrosion.

For these reasons it is advisable to not allow water to form pools on the seat. Tip the product to ensure that rainwater will drain properly, cover or put the furniture away during the winter, and wash all surfaces with water and neutral detergent.
