

LA GRANDE TABLE

Xavier Lust
2002

XX Compasso d'Oro ADI
special mention

INDOOR / OUTDOOR

all versions

Tables made with a curved natural aluminium sheet.

Finish:

- matt painted aluminium X059
- matt painted white X053
- gloss painted white X060.

Outdoor use

The table is also suitable for outdoor.

Any material left outside, even if properly treated, can have superficial molecular and colour changes during its lifetime. Of course, the amount of alterations is directly related to the amount of exposure to weather and to the geographical area (for ex., high humidity and/or salinity). Regular maintenance, for instance periodic cleaning with water, increase resistance to corrosion.

Besides assuring the lateral and longitudinal stability of the tables, the reinforcement beams (in height 70 mm with tables to 240 cm and in height 95 mm with larger sizes) and the supporting L-shaped profiles make it possible to have pieces of different thicknesses according to size, thus further improving them visually: in 80 cm wide tables the aluminium thickness is 5 mm, in the 90 cm wide tables the aluminium thickness is 6 mm.

Height 73 cm. Maximum length 4.40 m

Please note: the design of the table and the peculiarity of the bending in the aluminium sheet produce structural curvatures in the tabletop both in length and transversally. Such curvatures are a specific feature to the table.

For further information about specs, please refer to the technical section at the end of the price list (tables of materials/colours).
