SAMPLES

## Timber

Lowe Furniture primarily uses American White Oak and American Black Walnut, both are sustainably grown and arrive in Australia with a carbon neutral rating. As well as their sustainability credentials White Oak and Black Walnut possess intriguing and varying grain which adds to their unique and beautiful aesthetic.

However, Lowe Furniture can and have worked with almost any type of timber. From Australian native to more exotic species, Andrew and the team's knowledge of timber materiality means that no piece is unfit for purpose and will stand the test of time.

## Finishes

Lowe Furniture has carefully developed a wide range of core finishes to compliment any design or fit any space.

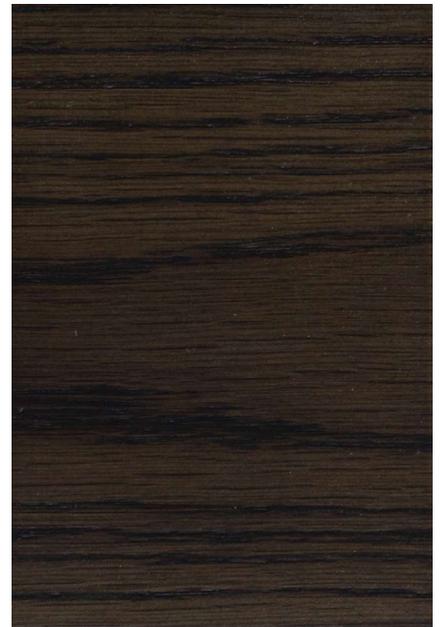

We also have the capacity to create custom stains and tones and match most existing finishes for a cohesive palate
