

## SIGN BABY

Piergiorgio Cazzaniga  
2017

INDOOR / OUTDOOR

all versions

With its bright colors and small size, the SIGN collection is completed with a “jaunty” variant for children, Sign baby.

This new type, which is available in 7 colour options, is the ideal choice for children aged 3-10 years.

#### Structure and finish

The single-material load-bearing structure is in polyethylene (PE)\*, moulded with rotational moulding technology.

Available in the matt versions of the colours white, pink, light blue, green, yellow, orange, red.

Only white, the purest and most delicate colour, is made with a particular mixture called EASY CLEAN. A specific additive added to the initial plastic material facilitates the cleaning and the maintenance phases.

\* The material (PE) can present some impurities internally, due to particular production treatments, which are included in the accepted quality standards.

Supplied with a removable foot, easily interchangeable to ensure perfect adaptation to every type of surface or flooring.

**Wide color range availability (extra from the standard) for lot >25 pieces (per color). Feasibility, prices and lead times to be verified with the sales dept.**

**For further information about specs, please refer to the technical section of the pricelist, tables of materials/colours.**

#### Outdoor use

The particular resistance of polyethylene and its simple maintenance make Sign perfect both indoors and outdoors.

Any material left outdoor, even if properly treated, due to the action of weathering, can have superficial molecular and colour changes during its lifetime. Of course the amount of alteration is directly related to the amount of exposure to weather and to the geographical area. Regular maintenance, for instance periodic cleaning with water, increases resistance to corrosion.

For these reasons it is advisable to not allow water to form pools on the seat. Tip the product to ensure that rainwater will drain properly, cover or put the furniture away during the winter, and wash all surfaces with water and neutral detergent.

**Ref. regulations ISO and UNI EN, please refer to the technical section at the end of the price list.**
