Pet's Name: **Chewie**

Pet's Breed & Sex: **Am. Staff & APBT/Female**

Describe condition of pet and/or symptoms before using *Affordable Testing*.
Always very itchy, red scaly skin with multiple yeast infections.

What type of food was your pet eating prior to testing (i.e. kibble, raw, frozen, freeze dried, etc.)?
Kibble (Canidae healthy weight)

Describe the results of *Affordable Testing* (i.e. number and/or examples of items reported as intolerances, insight gained, etc.).

She's allergic to almost everything you can think of

What elimination plan did you implement (i.e. foods eliminated and/or changes in environment, timeframe, etc.)?

Slowly eliminating most intolerances, she's been put on a raw food diet now.

Describe condition of pet and/or symptoms after the elimination plan.

She's no longer scratching as much, the itchiness has gone from a 10 to a 2. Her skin is no longer red/pink and scaly.

What is your impression of the *Affordable Testing* process and results of the elimination plan (i.e. length of time to receive results, quality of customer service, value of information gained, etc.)?

The time it took to get the results was incredibly fast I was very impressed and the accuracy is 100% due to her having previous blood test showing allergies I was able to cross reference and it was spot on.
