The True Cellular Detox™ 90 Day Menu Plan

The True Cellular Detox™ 90 day menu plan is designed to act as a jumpstart to your new healthy lifestyle and to support your body during the [True Cellular Detox™](#) program. The diet plan includes a wide variety of produce, [proteins](#), [healthy fats](#) and some sweet treats to encourage [detoxi cation](#), [weight loss](#) and [cellular healing](#)... and tastes delicious too!

1. Begin by making the 3 exchanges:

Exchange your grains

Instead of consuming modern denatured, hybridized, genetically modified (GMO) grains, choose safer grains and starches such as rice varieties, buckwheat (technically a seed), and ancient grains.

Ancient grains include quinoa, amaranth, millet, teff, [chia](#) and sorghum (all gluten-free) and farro, kamut and spelt (contain healthy gluten). Ancient grains are different from modern grains because they have not been denatured and changed. Therefore, these types of grains, including those which contain gluten, do not have the negative effects of modern denatured and glutenous grains.

However, if you're interested in removing ALL grains from your diet to more quickly decrease [cellular inflammation](#), choose the Lower Carb (aka "LC") option on the weekly menu plans to make meals grain-free. Also, please watch the "Three Exchange Diet" video for more information on gluten, grains and GMOs, and how they may be connected to [leaky gut syndrome](#).

Exchange your sugars

Instead of toxic refined sugars and [artificial sweeteners](#), replace with small amounts of naturally processed [stevia](#), [xylitol](#), raw honey and Grade B maple syrup (more minerals than Grade A).

Exchange your fats

Instead of rancid, inflammation-producing, GMO vegetable oils like corn, canola and soybean, choose high quality fats like [unrefined coconut oil](#), [grass-fed butter](#) and tallow, avocado oil and extra virgin olive oil.

Choose when possible:

- 100% grass-fed (and finished), organic and local animal products
- Organic, local and seasonal produce
- Raw, organic, cultured and 100% [grass-fed dairy products](#)

Avoid as much as possible:

- [Toxic vegetable](#) oils (i.e. corn, canola and soybean commonly used in restaurants... ask questions!)
- Avoiding non-approved grains and ALL refined sugars until [inflammation](#) is decreased
- [Factory farmed animal products](#)
- Genetically Modified Organisms, a.k.a GMOs (corn and soy are the top offenders)

Other notes:

- [Smoothie recipes](#) typically make enough for 2 servings or 2 days worth of breakfasts. To enjoy for two days, simply pour smoothie mixture into two mason jars and refrigerate one for the following day. Find more smoothie recipes in the resources section.
- Snacks are optional (or may be eaten with lunch) and likely not needed if consuming enough [quality fat](#).
- Breakfast is optional (see below for intermittent fasting technique) and may not be desired once you've shifted into the "fat burning zone," wherein you become a fat burner instead of a sugar burner. For more info read the two articles on [ketosis](#) in the resources section.
- Dinner is prepared fresh nightly and leftovers are re-imagined for lunch the following day.

-
- Lunch is typically leftover [protein](#) over a mixed greens salad and/or stuffed in lettuce wraps. [Salads](#) and wraps can simply be dressed with extra virgin olive oil, vinegar (apple cider, balsamic, red wine) and sea salt, mustard, mashed avocado or any other [homemade dressing](#) with [healthy fat](#).
 - Dessert is optional (may decelerate weight-loss).
 - Note Lower Carbohydrate (LC) options on the menu if looking to reduce carbohydrate intake.
 - Include plenty of fermented foods to support a healthy gut (sauerkraut, kimchi, [yogurt](#), kombucha, kefir).
 - See recipe list for meal how-to's.
 - See corresponding grocery lists for shopping guides.
 - Grocery quantities depend upon size of household (and appetite!). When [intermittent fasting](#), less food is purchased.

For intermittent fasting option:

- Simply skip breakfast and drink [pure water](#) and/or [organic coffee](#) or [tea](#) with [good quality fat](#) added such as [MCT oil](#), [coconut oil](#), grass-fed heavy cream or [butter](#), coconut milk or homemade nut milk. The good fat added to your beverage helps to prevent blood sugar dips throughout the morning and turns your [brain](#) "on" to jumpstart the day. You can also add [grass-fed collagen powder](#) to your morning beverage for protein if desired, and a sprinkle of [cinnamon](#) is helpful for blood sugar regulation.
- Try to wait and consume a later lunch, between 1PM and 3PM, to extend the fasting window between 16 and 18 hours. A light lunch of [quality fat](#) and [protein](#) is suggested to maintain your energy levels throughout the day and avoid the dreaded post-lunch "slump." Simply have a smaller lunch portion or enjoy a [high fat smoothie](#).
- Aim to eat dinner between 5PM and 8PM and include most of your daily carbohydrates at this meal. Be sure to make dinner a big and satisfying meal. This is very important! If you do not eat enough food at dinner your body will think it's starving and hang on to fat stores. Eating a large meal with adequate carbs also helps to spike your blood sugar enough to promote [restful sleep](#).

See resource article on intermittent fasting.

- To follow a Lower Carbohydrate (LC) diet and/or [ketogenic diet](#):
 - Focus on eating mostly fat (60-70%), moderate amounts of protein and very small amounts of carbohydrates.
 - See the resource articles 1 and 2 for further information on the [ketogenic diet](#) and [troubleshooting suggestions](#).
 - Also, watch the video on implementing this advanced strategy into your program in the resources section.

Remember: Diet Variation!

- Follow the [basic diet](#) for a few months and then experiment with intermittent fasting. Perhaps then try the [ketogenic diet](#) for a month or two then shift back into eating a moderate carbohydrate diet. The point is to mix it up and take advantage of your body's innate adaptation mechanisms to increase your health, lose stubborn weight and [regulate hormones](#).
- See resource article for further information on implementing the Diet Variation technique.

BREADS/PANCAKES

Skillet Bread

1 egg
 ½ tsp. baking soda
 ½ cup yogurt, unsweetened, full fat
 1 ½ tsp. olive oil
 1 cup almond flour
 Sea salt to taste
 ½ tsp. dill weed or other seasoning

1. Beat the egg, yogurt and baking soda. Let it foam for 1-2 minutes and then beat in the oil. Add the dill and salt. Add the flour last. The batter should be thick.
2. Spray a skillet with grapeseed oil spray. Place the skillet over medium heat. For each piece of bread, make a pancake using 2 rounded Tbsp. of batter dropped onto the skillet. Use a spatula, coated with spray, and spread out the batter. Cook like a pancake on both sides. When done, move the bread to a plate to cool.
3. Use the bread for an open faced sandwich or make an individual pizza. Wrap extras and store them in the refrigerator.

Focaccia-Style Flax Bread

2 cups flax seed meal
 1 Tbsp. baking powder
 1 tsp. salt
 1-2 Tbsp. stevia
 5 beaten eggs
 ½ cup water
 ½ cup olive oil

1. Preheat oven to 350° F. Prepare a 10x15 pan (with sides) with oiled parchment paper or a silicone mat.
2. Whisk dry ingredients well
3. Add wet to dry and combine well. Make sure there are no obvious strings of egg white hanging out in the batter
4. Let batter sit for 1 or 2 moments to thicken up (if left too long, it gets to a point where it's difficult to spread)
5. Pour batter on pan. Because it's going to tend to mound in the middle, you'll get a more even

thickness if you spread it away from the center somewhat in roughly a rectangle an inch or so from the sides of the pan (you can go all the way to the edge, but it will be thinner).

6. Bake for 17 to 20 minutes until it springs back when you touch the top and/or is visibly browned even more than the one already is.
7. Cool and cut into slices of desired thickness.

Other alterations to recipe: add in 3 Tbsp. of Italian seasoning and 4 Tbsp. of Parmesan cheese. You can also add asiago cheese and chopped black olives on top and keep the sweetener out of the recipe.
