

S-Electro Elite FAT

€0,00

Hardtail | E-Fat | Alloy | 26" Fat

The S-Electro Elite Fat shares design language with the Elite Comp. The Elite FAT features a complex hydro formed alloy frame with a class dominating 720Wh internal battery located in the downtube. The Elite FAT is designed around all-day comfort geometry and compatible with gigantic 4.8" FAT tyres. This makes the S-Electro Elite FAT a very capable exploration or touring bike, and with the high capacity battery, you could venture vast distances assisted, without the need for recharge on the way. And when you have to recharge, the battery can be charged in-place in the frame, or where power outlets aren't close by, the battery can easily be removed.
