

Stratos AL SX

€1.461,00

Dual-Suspension | Cross-Country | Alloy | 29"

Stratos AL SX is a value packed trail-ready full suspension mountain bike for every recreational rider. Silverback's POP geometry, along with the super wide range Eagle drivetrain, makes it a strong climber and a balanced confident descender. The linkage driven asymmetric single-pivot suspension is tuned for optimal small bump sensitivity and big-hit compliance without power delivery penalties. The suspension curve is designed to offer full use of available travel. The Stratos AL SX uses the same frame as the AL 1.0. Based on the groundbreaking Stratos CF race-machine, but adapted to offer a more value-focused, mild-mannered bike for the everyday rider. Time to upgrade from that hardtail or ready for more demanding trails? The Stratos AL SX is designed to take care of Trails, XC or marathon business.

SPECIFICATIONS.
