

NON-SLIP 60° Diamond Mini

Use this 8½" 60 Degree Diamond Ruler to cut diamonds, triangles, hexagons, parallelograms, trapezoids.

NON-SLIP 60° Diamond Mini

Cutting Trapezoids

Use the ruler to cut trapezoids from strips (2½" x 4½" shown). Center a 2½" strip between the 4½" triangle line and the 2" star 'burr' line. Cut on both sides of the ruler. Rotate the ruler 180 degrees to make the next cut.

Cutting Parallelograms

Use the ruler to cut parallelograms from strips (2½" x 4½" size shown). Using a 2½" strip, lay the side edge of the ruler along the top edge of the strip and the 2½" diamond line and the continuing star 'burr' line along the bottom. Cut on both sides of the ruler to get a 2½" x 4½" parallelogram.

Cutting Parallelograms Cont.

To cut smaller parallelograms, cut the end of the strip off with the 60 degree angle, then move the ruler down the strip aligning the cut end with the appropriate diamond line on the ruler. Make 2½" x 4½", or 1½" x 3½"... etc.

NON-SLIP 60° Diamond Mini

Cutting 60° Diamonds

Use the ruler to cut diamonds from strips, ranging in sizes from 1½" - 4½". (4½" size is shown). Align the ruler on the strip and cut along the 60 degree angled edge on both sides of the ruler. Cut six diamonds and join together to make a star.

To cut smaller diamonds from smaller strips, cut the end off the strip using the 60 degree angle, then move the ruler down the strip aligning the cut end with the appropriate diamond line on the ruler. (1½" strips line up to the 1½" diamond line... etc.) before making the next cut.

Cutting 60° Triangles

Use the ruler to cut triangles in sizes from 1½" - 4½". (2½" size shown). Using a 2½" strip, line up the 2½" triangle line with one edge of the strip and the flat tip with the other. Cut on both sides of the ruler. Rotate the ruler 180 degrees to make the next cut.

Cutting Hexagons

Use the ruler to cut hexagons from 1½" - 4½" (4½" size shown). Center the ruler over a 4½" strip, aligning the 4½" white dashed hexagon lines on the top and bottom of the strip. Cut on both sides of the ruler to make a hexagon.

To cut smaller hexagons as shown here with a 2½" strip, center the white dashed 2½" hexagon lines on the top and bottom of a 2½" strip, making sure the left side of the hexagon bracket is fully on the strip. Cut the right side off. Then rotate the cut piece 180 degrees, and align the cut end with the 2½" bracket. Trim off the remaining fabric.

Krista Moser

The Quilted Life

This handy cutting chart is calculated using the Creative Grids 60° diamond rulers. This shows you how many diamond cuts you will get from a 42" long strip in each size from 1½" – 8½".

These strips are opened before cutting to maximize the number of cuts.

DIAMOND CUTTING CHART

CREATIVE GRIDS 60° DIAMOND RULERS

STRIP SIZE	NUMBER OF CUTS	WIDTH OF FABRIC (42")
1½"	23	
2½"	14	
3½"	9	
4½"	7	
5½"	6	
6½"	5	
7½"	4	
8½"	3
