Bio-Botox – Our anti-aging product range

All our **Bio-Botox** products contain the powerful ingredient – **Acmella Oleracea Extract**.

Acmella Oleracea Extract is a cress extract that provides an immediate smoothing effect by visibly and quickly reducing facial wrinkles and gives the skin a youthful and radiant appearance. **Acmella Oleracea Extract** reduces the intensity of muscle contraction, relaxes facial features, and helps to smooth expression lines.

In addition to the **Acmella Oleracea Extract** our **Bio-Botox** product range offers further skin-enhancing ingredients:

The day-, night- and hand-cream contain **hyaluronic acid**, which has moisturizing and skin-rejuvenating properties. It hydrates the facial skin and makes it more elastic and resilient.

The **smooth skin complex** used in our **Bio-Botox** serum and peeling contains **caffeine**, which promotes blood circulation in the skin, thereby supporting the supply of important nutrients to the skin.

Bio-Botox Serum
