## Ultra-colloidal hyaluronic acid

for firm and moisturized skin

100 ml e

### Ingredients:

Aqua, Sodium Hyaluronate.

### Directions:

Spray onto the skin. Spray the ultra-colloidal hyaluronic acid spray gel onto the skin over a large area and massage in gently if necessary. After the spray gel has been absorbed, further skin care and/or make-up can be applied.

**Hyaluronic acid can bind up to 1000 times its own weight in water.** The water molecules are bound by hyaluronic acid in and on the surface of the skin and keep it moisturized. The ultra-colloidal hyaluronic acid spray reduces transepidermal water loss and additionally enriches the skin with moisture.

### Hyaluronic acid

- Increases the skin's moisture content.
- Reduces the feeling of tightness in the skin.
- Improves the skin's elasticity.
- Can delay the formation of wrinkles and therefore has a preventive effect against skin ageing.
- Can reduce the depth of existing wrinkles.
- has a soothing effect on reddened skin and burns.

Store at a temperature of  
15 °C to 25 °C.

### Free of:

alcohol

microplastics

dyes

parabens

paraffins

animal  
ingredients

mineral oils
