vitaADDmin Senior provides important micronutrients for health and mental performance in advanced ages:

- Omega-3 fatty acids contain the valuable components eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).
- Vitamin A and its provitamins lutein and zeaxanthin contribute to the maintenance of healthy vision.
- Zinc and pantothenic acid contribute to normal cognitive and mental performance.
- Contains a vitamin B complex and pantothenic acid, which contribute to the physiological function of the nervous system and to the reduction of tiredness and fatigue.
- Vitamin C protects the cells from oxidative stress and contributes to healthy energy metabolism.
