\* **Unrestricted airflow** = The airflow values provided with clean filters, no hose kit, at 115V and measured by using wind vane. The numbers may vary depending on voltage and test procedure used.

\*\* **Settable range** = BOFA recommends utilizing the lowest flow rate that achieves the correct capture velocity for your application in order to maximize filter life.

\*\*\* **UL** = Tested to UL standards, but testing may be provided by alternate nationally recognized test laboratories. Certain product configurations may affect the UL certification. Please speak to your sales representative.
