

Installation Instructions for Universal Laser #3 Mirror

Before you begin, make sure that the VLS is powered OFF and unplugged.

1. Open the Top Door and pull the X-axis Arm forward to access the Focus Carriage.
2. Remove the three thumbscrews from the Focus Carriage and set them aside in a safe place.
3. Slide the Lens Kit out of the Focus Carriage and place it on a soft, non-abrasive cloth.
4. Remove the two Phillips head screws that attach the current #3 Mirror to the Front Cover Plate, and remove the optic.

5. Attach the new #3 Mirror to the Front Cover Plate. Leave the Phillips head screws slightly loose.
6. Clean the Focusing Lens and #3 Mirror if necessary.
7. Carefully reinstall the Lens Kit using the thumbscrews that were removed earlier.
8. Tighten the Phillips head screws to secure the new #3 Mirror to the Front Cover Plate.
