

# Model & Serial Number Identification

## How to Find the Model Numbers on Your Matrix Equipment

To determine which version number your model is, locate the decal at the bottom of the frame. The location varies by frame type as indicated in the diagrams below. The console number can be located on the decal on the back of the console (below right).

### Frame Model Number

The model number is printed on the top of the decal. The model version is indicated by – 0#. The example below shows a TF50 treadmill and the version number is – 02, or TF50-02.

### Frame Decal

### Console Model Number

The console name is either XR, XER, XIR or XUR. The model version is indicated by a – 0# after the model name. The example below is an XIR console and the version is – 02, or XIR-02.

### Console Decal

## Serial Numbers

When downloading software, you may also be asked to confirm the first 6-7 digits of the console serial number. It can be found on the same decal, below the model number.
