EK DESIGN

## Founder's Note

Ek Design was the culmination of an idea : To bring Indian design to the forefront of global consideration in an era where furniture has evolved from being a mere requirement in a blank space, to the expression of a collective identity. Every piece that moves out of the workshop and into a customer's space reinforces the belief that we are treading the right path, bringing these talented artisans on board and channelling their energies in the right direction, while providing a platform that expresses our creativity and the means to achieve them in-house.

We stand tall as a design studio that trusts in the process, manifesting visions from the drawing board into reality with an underlying tone of communication that leads to a complete & cohesive output in aesthetics, ergonomics and value. Our competitive streak ensures that we pioneer the radical ideas of what furniture can truly be. We believe that there will always be takers for honest design, and faith in our capabilities will be rewarded in an investment of an item built to last generations.

The right sofa has the ability to anchor the frame of your living space, directing the design language of a space in which you inadvertently find yourself spending most of your day.

Let's make it count.
