VINOTEMP® TO LAUNCH ZERO-G™, A SUSPENDED WINE RACKING SYSTEM AT THE 2016 NATIONAL KITCHEN + BATH INDUSTRY SHOW

Vinotemp®, a recognized leader in the wine storage and refrigeration industry for 30 years, is unveiling its proprietary Zero-G™ Suspended Wine System at the upcoming National Kitchen + Bath Industry (KBIS) Show, Las Vegas, Nevada, January 19 - 21, 2016, (booth S4065).

Zero-G, Vinotemp's latest wine racking solution, creates the illusion of floating or suspended wine bottles while providing a secure and customizable storage space.

"The trend towards contemporary and minimal design aesthetics in residential design continues to gain popularity, while private wine collecting and investing continues to increase at the same pace. Today's modern home owners are looking for innovative wine bottle storage options that properly cellar their selection while providing an enticing visual display for family and friends," states India Hynes, CEO of Vinotemp.

"Vinotemp's new Zero-G Suspended Wine System is an extraordinary solution because it can be installed on its own or specified into new and existing cellars or cabinetry; providing home owners and collectors' limitless wine bottle display and storage options no matter the size of their space or depth of their collection."

The Zero-G Suspended Wine System is constructed using precision construction methods, white oak blocks and 3/8" aluminum rods. To ensure that the innovative racking complements its surrounding environment, the oak blocks may be stained or painted in the clients color choice. To personalize further, the Zero-G unit be designed to accommodate varying bottle sizes.
