For the wine and tech lovers, the [VinCave Wine Cellar 200](#) (\$20,000) provides a practical and advanced wine storage system for the vino-enthused. Made from 100% stainless steel, the European wine cellar offered exclusively by **Vinotemp** raises a collection of up to 200 bottles above ground with the push of a button. This unique wine storage solution provides connoisseurs an underground cellar without sacrificing floor/living space, making it the perfect luxury gift for any serious wine collector. The smart system uses the consistent temperature of soil to cool the cellar, so no cooling system is required, and it's equipped with integrated LED lighting along the steel walls. Laying flush with any finished floor, the glass top of the cellar provides the opportunity to 'walk over' the cellar as its able to handle a total of 550 pounds and through its electric motor, the cellar takes 42 seconds to fully come above ground at 32 inches above the finished floor.
