Irash Can Plus vacuum

Bruno SmartCan has an integrated floor-level vacuum system that will deliver every dog hair, Cheerio and grain of dirt from the floor directly into the trash bag. Simply place a broom in front of the vacuum inlet to start the suction, and Bruno® will do the rest. No more stopping, no more scooping.

Bruno SmartCan is poised to turn the trash can industry upside down. Its patent-pending technology and Wi-Fi-enabled smartphone app creates amazing results in home cleaning maintenance, organization and aesthetic. The Bruno app will remind users to take the trash out on trash day, and alert them when low on

Owls and Octopuses on Ice

Epicureanist™, provider of thoughtful, quality wine and libation accessories, unveiled exclusive owl and octopus inspired wine ice buckets at the International Home + Housewares Show. Crafted from hand-carved mango wood and featuring pewter design elements, along with a removable glass ice bucket, Epicureanist's newest product offerings are luxurious yet functional solutions for chilling wine.

"At Epicureanist we are dedicated to designing products that make entertaining at home simple, sophisticated and luxurious," states India Hynes, Epicureanist's Vice President and Lead Product Designer. "We've been intent on adding animal-inspired design to our wine accessory product offering as it's both on trend and unique. To ensure the new ice buckets were created in the spirit of the Epicureanist brand, we worked through many

variations of design and payed close attention to craftsmanship. This process led to two unique products that are as functional as they are beautiful."

Each owl and octopus inspired ice bucket is individually crafted using three materials: mango wood, glass and pewter. The process begins by creating a wooden shell to encase a removable glass ice bucket. Each shell is hand carved from a single piece of mango wood, hand-stained and delicately shaped to

fit the glass ice bucket. After the mango wood casing is complete, an antique finished, handpolished pewter owl or octopus design is meticulously placed and secured to the exotic wood shell.

Each animal inspired wine ice bucket weighs 8 pounds, has a 2,400 mL capacity, measures 8 inches high by 8 inches long, has an 8.25 inch diameter, and retails for \$295. To learn more about the Epicureanist Owl Ice Bucket and the Epicureanist Octopus Ice Bucket, visit epicureanist.com. KN
