## What's Hot

# What's Hot in Refrigerators

**1.** The new 36-in. built-in refrigerator, launching this month, is the largest in the Freedom Refrigeration Collection from **THERMADOR**. The column provides ample door space and allows for personalized configuration of produce bins and shelves, touch displays and other features.

**2.** **BEKO** has created a 19.9 cu.-ft., French-door refrigerator/freezer with meticulous temperature management and precise humidity control. The NeoFrost dual-cooling technology helps ensure that food stays fresher longer with two separate cooling systems to maintain optimal humidity in the fridge.

**3.** The **BIG CHILL** Slim is a 24-in.-wide refrigerator available in 200 custom colors, as well as the company's signature retro-inspired palette. The Slim features a shaped metal body, authentic chrome trim and pivoting handle and an optional icemaker.

**4.** **LIEBHERR APPLIANCES** introduces its HW 8000 fully integrated 24-in. wine cabinet. Its panels can be customized to match cabinetry heights of 70, 80 or 84 inches, and up to 80 wine bottles can be stored on the wooden shelves.

**5.** **BLOMBERG**'s new 36-in.-wide counter-depth unit with French doors uses Blomberg's Blue Light Technology, which keeps fruit and vegetables fresher longer. The refrigerator is also equipped with independently zoned and controlled cooling systems to maintain even air temperature and humidity.

**6.** The 72-in. counter-depth French-door refrigerator in the Black Stainless Collection of appliances from **KITCHENAID** is being re-launched this month with the addition of a door-in-door window feature. Motion-censored lighting is used to illuminate this window feature.

**7.** **VINOTEMP** has launched the Element by Vinotemp 168-Bottle Smoked Black Stainless Steel Dual-Zone Wine Cooler to meet the demand for black stainless steel kitchen appliances. It features dual-zone cooling, a smudge-proof finish and specially designed steel-and-wood wine racks.

**8.** **SOMMI WINE CELLARS'** Brock Dual Wine Fridge has two fridge areas, each able to hold up to 18 bottles with temperature settings from 39 degrees to 55 degrees. The middle cabinet was made to stash other entertaining essentials, such as stemware and openers.

**9.** **DACOR**'s Modernist Collection includes refrigerator columns that feature PreciseCooling technology, as well as dedicated compressors and evaporators to maintain freshness and preserve flavor. Push-to-Open Door Assist opens the door with a slight push, and IQ RemoteView cameras allow users to see what's inside from their smart phone. A full-height door offers flush cabinet integration with no grill exposure.
