

Wine-Mate 12000SSD Split Ceiling- Mounted Wine Cooling System

Wine-Mate ceiling mount split cooling systems WM-2500~12000SSD are designed and used to provide a cold temperature between 50~65 °F for a properly insulated wine cellar. The wine cellar will maintain humidity range within 50~75% RH. These temperature and humidity ranges like in natural caves are optimized for long term storage of wine. SSD units consist of a condensing unit and an evaporator unit; they are connected by a liquid line and an insulated suction line. SSD condensing units can be located away from the wine cellars 75 ft so that noise and compressor vibration are isolated. SSD evaporator units provide two way air supply operation. The evaporator units can be installed on the ceiling in the center of a wine cellar.

Key Features

- Stable temperature between 50~65 °F
- Maintain humidity of 50~75% RH even when the environment becomes dry or humid
- The condensing unit can be placed away from the wine room as far as 75 feet, which will bring an extremely quiet operation
- Perfect for storing cigars, chocolate, salami, and fine leather and furs (additional cost and customization required)

Specifications

Cellar Size:	3300 cu ft
Btu/h, CFM:	12000 Btu/h
Decibel Rating:	1140 CFM
Dimensions:	Evaporator: 29-7/8"W x 21"D x 17"H Condenser: 26"W x 22"D x 18"H
Electrical:	Evaporator: 115V/60Hz/5A Condenser: 230V/60Hz/15A
Weight:	Evaporator: 70 lbs Condenser: 135 lbs
Refrigerant:	R134a
Thermostat:	Advanced Digital Control Display
