

## Wine-Mate 4500SSWC Split Ceiling- Slim Wine Cooling System

WINE~MATE split water-cooled ceiling-mounted cooling systems WM-4500SSWC are designed to provide a cold environment between 50~65 °F with a humidity range within 50~75% RH for a properly insulated wine cellar. These temperature and humidity ranges are optimized for long term storage of wine like that in natural caves. SSSWC evaporator units can be installed on the ceiling near walls of a wine cellar. The evaporator units have a special coil coating and provide multiple fan air supply for better air flow. Drain connection is invisible from the front to provide additional storage space under the unit. SSSWC cooling systems consist of a remote condensing unit and an evaporator unit and they are connected by a liquid line and an insulated suction line. SSSWC condensing units are water cooled so that exhaust ventilation is not needed. SSSWC condensing units can be located away from the wine cellars up to 75 ft so that noise and compressor vibration are isolated.

### Key Features

- Stable temperature between 50~65 °F for a properly insulated room in a normal environment
- Maintain humidity of 50~75% RH even when the environment becomes dry or humid
- The condensing units can be placed up to 75 ft away from the wine room, which will allow for extremely quiet operation
- These units require professional installation by a licensed refrigeration technician
- Perfect for storing cigars, chocolate, salami, and fine leather and furs (additional cost and customization required)

### Specifications

Cellar Size:	1000 cu ft
Btu/h:	4500 Btu/h
CFM:	301 CFM
Dimensions:	Evaporator: 28-3/4"W x 13-1/8"D x 12-1/2"H Condenser: 24"W x 18"D x 18"H
Electrical:	Evaporator: 115V/60Hz/1A Condenser: 115V/60Hz/6A
Weight:	Evaporator: 36 lbs Condenser: 60 lbs
Refrigerant:	R134a
Thermostat:	Advanced Digital Control Display
